

Hi, I'm Rhonda.

I am a married woman who has only been with my husband. We have three children who are 8, 6 and 2. My husband and I have sex on the third Thursday evening of every month. I have insurance and we both go to the doctor pretty regularly. I get all of my screenings done at my appointments. Nothing irregular comes up so I'm pretty certain I'm okay. I've never used drugs and I only drink wine on the third Thursday evening of every month.

Hi, I'm Terri.

I'm a party girl. WHOOP WHOOP!!!!!! I don't have a boyfriend but I do have a couple of people I get down with regularly. Occasionally, when I'm out partying and I meet someone I think is hot – I might give them some. I like to drink but I prefer to smoke weed for my high. I don't really use condoms because I'm on the pill – NO KIDS ALLOWED HERE!!! I've given blood once and I think they test you when you do that – so I think I'm good.

Hi, I'm Lester.

I am the Clinical Care Director at the Patch 'Em Up Community Health Center. On average we see about 1500 patients a month. Our patients range from people who have insurance to those who have no insurance at all. We offer a myriad of screenings and services so we are basically a "one-stop" shop. Our screenings include glucose, blood pressure etc. and our patients sign a general consent before they are seen by one of our providers.

Hi, I'm Earl,

The CTL Program Manager at AID Everyone. We are located in a pretty rough area of town and though we have a good relationship with the local community, people don't come in here for much except the free condoms and lube. I would say on average we see about 100 people a month who walk through the door. I can tell you we are in a high prevalence area and we would really like to test more.
