

Building Your Diabetes Education Program— “Everything You Need to Know and More”

Developing or operating a successful DSME program requires more than just an understanding of the National Standards for Diabetes Self-Management Education and Support. What about reimbursement and documentation? How does one write and follow up on behavioral goals or CQI plans?

AADE’s workshop, **Building Your Diabetes Education Program—“Everything You Need to Know and More,”** is designed to help not only navigate the National Standards but also understand other essential elements required for a comprehensive DSME program.

Upcoming Workshop: November 6-7 in Phoenix, AZ

For the first time, AADE is adding **a second day** to the popular workshop dedicated to the emerging realm of the National Diabetes Prevention Program.

By attending this program, you will be provided with:

- A comprehensive review of the National Standards/National Diabetes Prevention Program
- Reimbursement and documentation strategies for DSME
- Setting SMART goals and developing a CQI process
- Live chart auditing to help you develop your own charting requirements
- Marketing, recruitment and sustainability tools
- Skills to build a business case for adding a diabetes prevention program to an existing DSME program.
- An understanding of the current landscape for reimbursement of prevention

Plus a binder full of sample resources to use in your own practice while earning **10 CE!**

Cost: \$350 Members/\$395 Nonmembers
