Introduction

Report Organization

This 2000 Publication is the 81st continuous production of the Georgia Vital Statistics Report. Vital events are defined as births, deaths, induced terminations of pregnancy, and fetal deaths. Statistics of vital events provide a unique source of information about the health, behavior, and wellness of a population. The monitoring of such major life events provides essential information to individuals, institutions and agencies involved in analyzing, planning, and evaluation health service delivery for Georgia residents.

This 2000 Vital Statistics Report has been organized into the following four sections:

- Natality, Fetal Deaths, and Induced Terminations of Pregnancy,
- Mortality,
- Population, and
- Most Popular Infant First Names.

The information in this volume consists of annual frequencies and rates for selected vital events for residents of the state. Information is presented for the state, the nineteen public health districts, the metropolitan statistical areas (MSAs), non-MSA counties, and the 159 counties. Public health district and other geographic areas appear in alphabetical order.

Definitions of terms follow this Introduction, as does a list of cause-of-death categories and codes.

What's New?

- This year is the second for which ICD10 codes were used to classify causes of death. A crosswalk between the ICD9 code categories used in pre-1999 vital statistics reports, and the ICD10 code categories used in this report follows this introduction.
- This year is the second for which geocoded birth, death, and fetal death records are used in the vital statistics report. Geocoding is a process that matches a street address to a map location, and will correct county and state of residence. For example, of the 63,657 Georgia resident deaths in 2000, the county of residence was corrected in 1,310 (2.1%) records. Geocoding is used so that we may more accurately represent the population of Georgia.

Sources

State and county populations used to create rates in this document are prepared by the U.S. Census. Populations and documentation are available from their website (<http://www.census.gov>). Census populations include military, students, and institutionalized persons if in their usual and customary residence.

This report includes 2000 Georgia resident data taken from birth, death, fetal death, and induced termination of pregnancy certificates received in the State Vital Records office by August 16, 2001 (records received after this date are not included in the report).

Race and Ethnicity Data

Data reported in the Natality and Mortality sections are presented as Black, White and Total. Race is a self-reported characteristic on vital records: White represents those who report being White, Black represents those who report being Black or African-American and Total includes Black or African-American, White, Asian, American Indian or Alaska Native, Native Hawaiian or Other Pacific Islander, and Multiracial. To utilize data for the nonwhite, non-black populations subtract the white and black numbers from the total number. Population counts from the U.S. Census for 2000 showed that the Asian, American Indian or Alaska Native, Hawaiian or Other Pacific Islander, and Multiracial populations represented 2.1, 0.3, 0.1, and 1.4 percent of Georgia's total population respectively. Hispanic ethnicity is not a race category; Hispanics represented 5.3% of the state's population in 2000.

For More Information

Other vital Statistics data not presented in this publication are available upon request. All statistical requests should be directed to:

VITAL STATISTICS DEFINITIONS 2000

Demography

Hispanic Origin - Hispanic origin includes persons of Mexican, Puerto Rican, Cuban, Central and South American, and other or unknown Latin American or Spanish origins. Persons of Hispanic origin may be of any race.

Race - Per the Federal Office of Management and Budget, Directive 15, White is a person having origins in any of the original peoples of Europe, the Middle East or North Africa; Black or African-American is a person having origins in any of the black racial groups of Africa; Asian is a person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand and Vietnam; American Indian/Alaska Native is a person having origins in any of the original peoples of North and South America (including Central American), and who maintains tribal affiliation or community attachment; Native Hawaiian or Other Pacific Islander is a person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands; Multiracial is a person declaring 2 or more of these races.

Geography

Metropolitan Statistical Area (MSA) - An MSA is a standard developed by the Federal Office of Management and Budget. Each MSA must contain either a place with a minimum population of 50,000 or a Census Bureau-defined urbanized area and a total metropolitan area population of at least 100,000. The 100,000 person total applies to all counties which may comprise the metropolitan area under observation. To be classified as part of an MSA, a county must have a specified level of employed workers who commute to the central county. Note that the population figures reported in the Vital Statistics Report for the Columbus, Augusta, and Chattanooga MSAs include only the population contained within the state of Georgia. These MSAs have population in contiguous counties in other states. For further explanations see <http://www.census.gov>.

Public Health District - The state of Georgia is divided into 19 Public Health Districts. Each District has a various number of counties, and each county has a health department.

Natality Section

Age-Specific Fertility (Birth) Rate (ASFR) - The total number of live births occurring to females in a specified age group during a specified time period (usually one year) per 1,000 females in the specified age group. Formula = [Total Number of Live Births in a Specific Age Group / Total Female Population in Specific Age Group] * 1,000. Presentation example: "...the 15-17 Age-Specific Fertility Rate was..."

Birth Weight - Infant's weight recorded at the time of birth.

Birth Weight Group - A group of birth weights, such as <500 grams, 500-1,499 grams, 1,500-2,499 grams, 2,500-4,499 grams, and 4,500+ grams, although any 250 gram increment can be used. Presentation example: "...the 1500-2499 Birth Weight Group included..."

Birth Weight-Specific Percentage - Total number of live births in a specified birth weight group during a specified time period (usually one year) per 100 total live births. Formula = $[\text{Total Number of Live Births of Specific Birth Weight Group} / \text{Total Number of Live Births}] * 100$.

Crude Birth Rate (CBR) - The total number of births occurring in a population during a specified time period (usually one year) per 1,000 total population. Formula = $[\text{Total Number of Live Births} / \text{Total Population}] * 1,000$.

Fertility – The actual production of live offspring. Fetal deaths and induced abortions are not included in the measurement of fertility in a population. It is not fecundity, which is the physiological capability to reproduce.

Fetal Death - Death prior to the complete expulsion or extraction from its mother as a product of human conception (neither a live birth nor an induced termination of pregnancy), irrespective of the duration of the pregnancy. The death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. A fetal death certificate is completed for all fetal deaths in Georgia regardless of gestational age. However, the number and rate of fetal deaths are calculated for only those at or greater than 20 weeks gestation.

Fetal Mortality Rate - The total number of fetal deaths (at or greater than 20 weeks gestation), per 1,000 fetal deaths (at or greater than 20 weeks gestation) plus total live births. Formula = $\text{Number of Fetal Deaths (at or greater than 20 weeks gestation)} / [\text{Number of Fetal Deaths (at or greater than 20 weeks gestation)} + \text{Total Number of Live Births}] * 1,000$.

General Fertility Rate (GFR) - Total number of live births that occur during a specified time period (usually one year) per 1,000 females ages 15-44 years of age. Formula = $[\text{Total Number of Live Births} / \text{Total Female Population 15-44 Years of Age}] * 1,000$.

General Induced Termination of Pregnancy Rate - Total number of induced terminations of pregnancy that occur during a specified time period (usually one year) per 1,000 females 15-44 years of age. Formula = $[\text{Total Number of Induced Terminations of Pregnancy} / \text{Total Female Population 15-44 Years of Age}] * 1,000$.

Induced Termination of Pregnancy - The purposeful interruption of pregnancy with the intention other than to: 1) produce a live-born infant; or 2) to remove a dead fetus. An induced termination of pregnancy does not result in a live birth.

Infancy - The period from birth through the 364th day of life.

Live Birth - The complete expulsion or extraction of a product of conception from its mother, irrespective of the duration of the pregnancy, which after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

Low Birth Weight - A live birth of a birth weight less than 2500 grams (5lbs. 8oz.).

Low Birth Weight Rate (Percentage) - Total number of live births weighing under 2,500 grams born during a specified time period (usually one year) per 100 total live births.
Formula = $[\text{Total Number of Live Births under 2,500 grams} / \text{Total Number of Live Births}] * 100$

Nativity - Pertaining to birth.

Out of Hospital Births - The total number of live births born outside of a hospital.

Percentage of Out of Hospital Births - Total number of live births born outside of a hospital in a specified time period (usually one year) per 100 total live births during the same time period. Formula = $[\text{Total Number of Live Births Not Born in a Hospital} / \text{Total Number of Live Births}] * 100$

Percentage of Live Births to Unwed Females - The total number of live births to females who are not legally married at the time of conception and did not marry during the time between conception and delivery, per 100 total live births. Formula = $[\text{Total Number of Live Births to Unwed Females} / \text{Total Number of Live Births}] * 100$.

Very Low Birth Weight - A live birth with a birth weight less than 1,500 grams (3lbs. 5oz.).

Very Low Birth Weight Rate (Percentage) - Total number of live births weighing under 1,500 grams during a specified time period (usually one year) per 100 total live births.
Formula = $[\text{Total Number of Live Births under 1,500 grams} / \text{Total Number Live Births}] * 100$.

Mortality Section

Age-Specific Death Rate (ASDR) - The total number of deaths occurring in a specific age group during a specified time period (usually one year) per 100,000 population in specified age group. Formula = $[\text{Total Number of Deaths in a Specific Age Group} / \text{Total Population in Specific Age Group}] * 100,000$.

Cause of Death - Reported causes of death are based solely on the underlying cause of death. The underlying cause of death is defined by the World Health Organization as the disease or injury that initiated the sequence of events leading directly to death or as the circumstances of the accident or violence that produced the fatal injury.

Cause-Specific Death Rate - The total number of deaths attributed to a specific cause during a specified time period (usually one year) per 100,000 total population. Formula = $[\text{Total Number of Deaths Due to a Specific Cause} / \text{Total Population}] * 100,000$.

International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM) - A statistical classification system, in use since 1979, that arranges diseases and injuries into groups according to established criteria. It is used to improve comparability of cause of death statistics reported by different governmental entities. Most ICD-9-CM codes are numeric and consist of three, four or five numbers and a description. The codes are revised approximately every 10 years by the World Health Organization and annual updates are published by the Health Care Financing Administration (HCFA (now the Center for Medicare, Medicaid Services)).

International Classification of Diseases, 10th Revision, (ICD-10) - An alphanumeric coding scheme that replaces ICD-9, and used for mortality data since 1999. ICD-10 codes were developed by the World Health Organization Collaborating Centres for Classification of Diseases.

Infant Mortality Rate (IMR) - The total number of infant deaths occurring during a specified time period (usually one year) per 1,000 total live births during the same time period. The data are reported by place of residence, not place of death. Formula = $[\text{Total Number of Infant Deaths} / \text{Total Number of Live Births}] * 1,000$.

Lifestage - An age year grouping methodology based upon predictable mortality. They are <1 Infancy, 1-4 Early Childhood, 5-12 Later Childhood, 13-19 Adolescence, 20-29 Early Adulthood, 30-44 Young Adulthood, 45-59 Middle Adulthood, 60-74 Late Adulthood, and 75+ Older Adulthood.

Neonatal Mortality Rate - The total number of neonatal deaths in a given time period (usually one year) per 1,000 total live births. Formula = $[\text{Total Number Neonatal Deaths} / \text{Total Number Live Births}] * 1,000$.

Neonatal Period - A live birth less than 28 days of age.

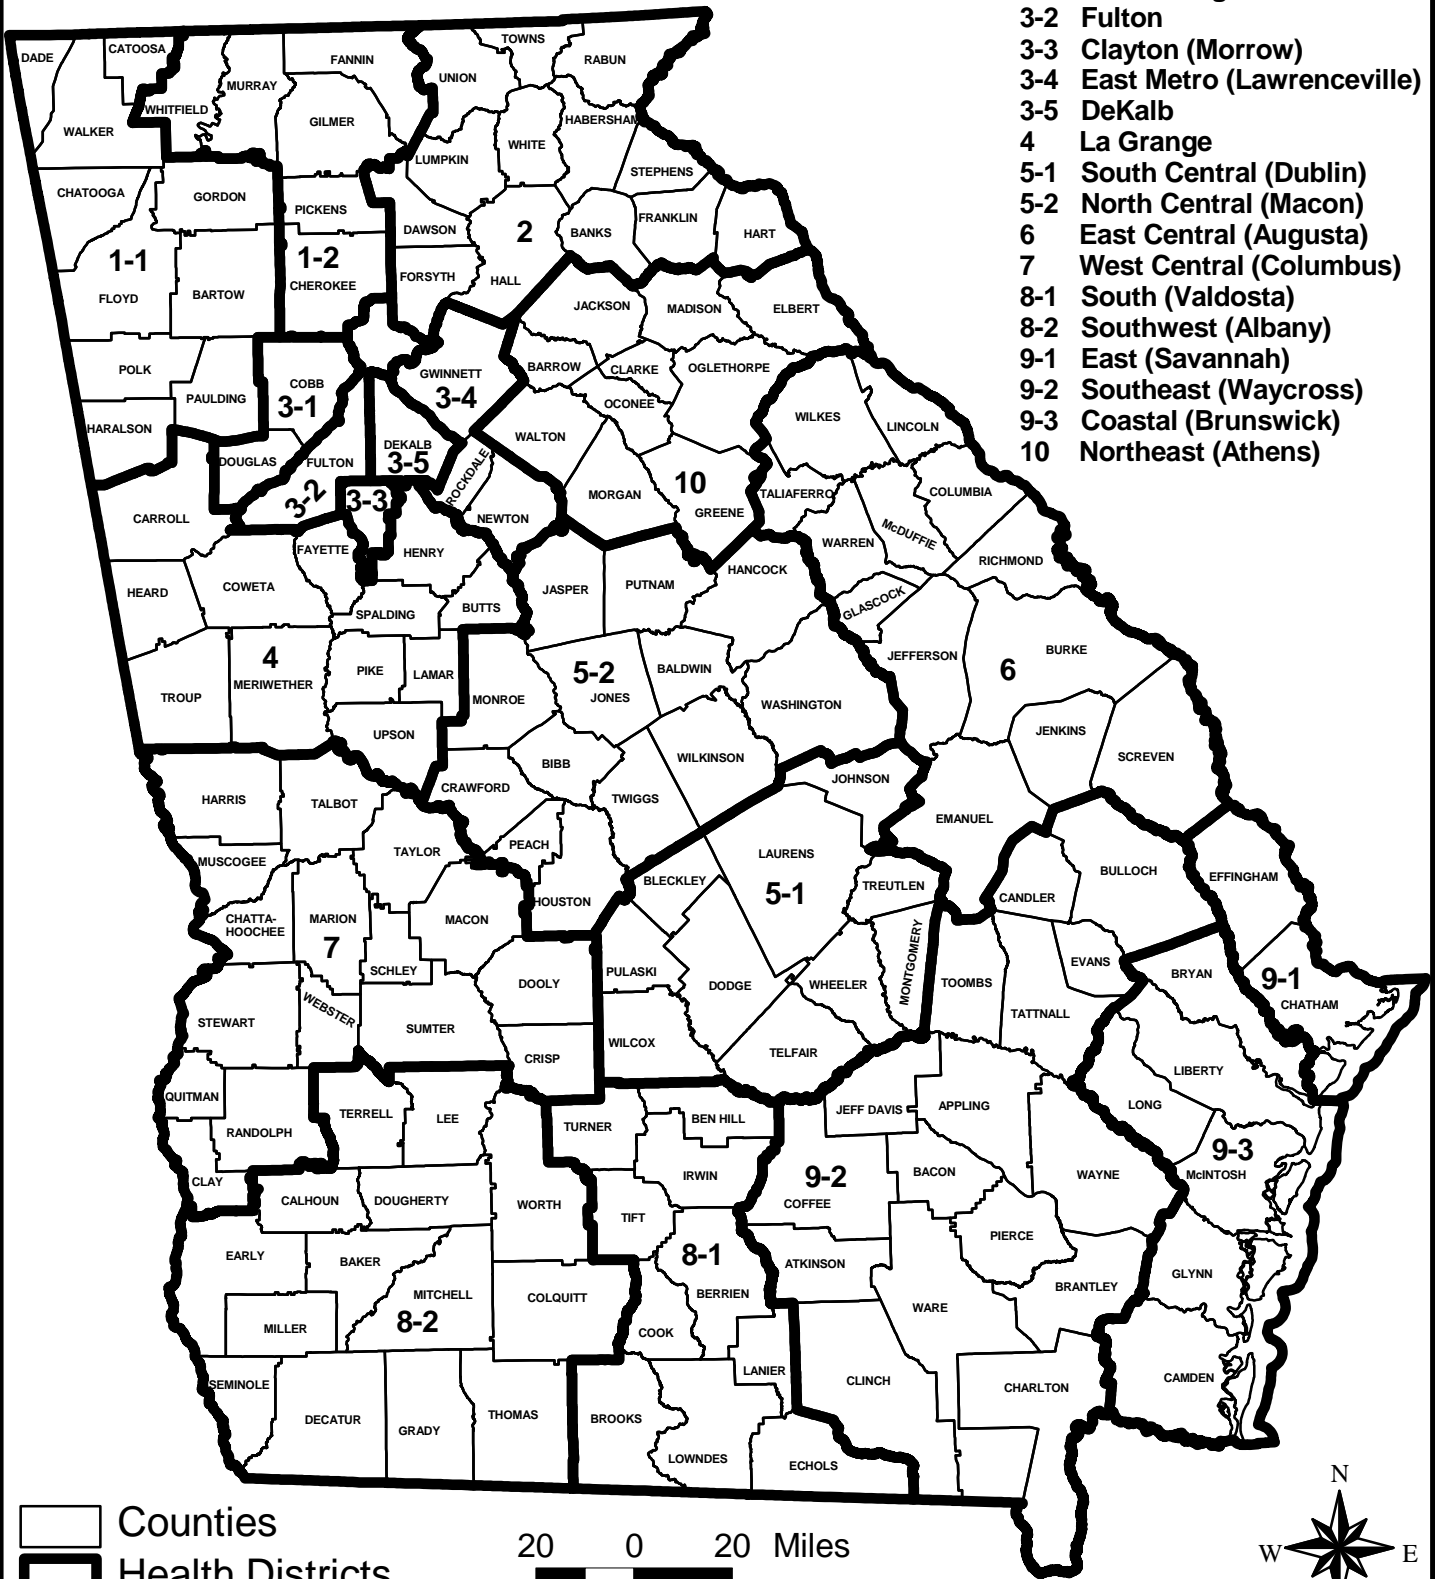

Postneonatal Mortality Rate - The total number of postneonatal deaths occurring in a specified time period (usually one year) per 1,000 total live births. Formula = $[\text{Total Number of Postneonatal Deaths} / \text{Total Number of Live Births}] * 1,000$.

Postneonatal Period - A live birth 28 through 364 days of age.

Sex-specific Cancer mortality rates - As reported in the Vital Statistics Report, Breast, Ovarian, Cervical and Uterine have only females in both the numerator and denominator, while Prostate and Testis, have only males in both the numerator and denominator.

Comparison between ICD9 and ICD10 Cause-of-death categories

Vital Statistics Report and ICD9 Categories before 1999		Vital Statistics Report and ICD10 Categories 1999+ (ICD9 codes in parentheses*)	
Infectious and Parasitic Diseases	001-139		
Septicemia	038	Certain Infectious and Parasitic Diseases	A00-B99 (001-139.8)
Septicemia	038	Septicemia	A40-A41 (038)
HIV Infection	042-044	Human immunodeficiency virus (HIV) disease	B20.0-B24 (042-044)
		Infections with a predominantly sexual mode of transmission	A50.0 - A64 (090-099)
		Tuberculosis	A16-A19 (010-018)
		Meningococcal infection	A39 (036)
		Neoplasms	C00-D48
		In situ & benign neoplasms	D00-D48 (210-239)
Neoplasms	140-239	Malignant Neoplasms	C00-C97 (140-208)
		Malignant neoplasms of lip, oral cavity and pharynx	C00-C14.8 (140-149)
		Malignant neoplasm of esophagus	C15 (150)
Stomach	151	Malignant neoplasm of stomach	C16 (151)
Colon	153	Malignant neoplasms of colon, rectum and anus	C18-C21 (153-154)
		Malignant neoplasms of liver and intrahepatic bile ducts	C22 (155)
Pancreas	157	Malignant neoplasm of pancreas	C25 (157)
Trachea, Bronchus and Lung	162	Malignant neoplasms of the trachea, bronchus and lung	C33-C34 (162)
		Malignant melanoma of the skin	C43 (172)
Breast	174-175	Malignant neoplasm of the breast	C50 (174-175)
		Malignant neoplasm of the cervix uteri	C53 (180)
		Malignant neoplasms of corpus uteri and uterus, part unspecified	C54-C55 (179, 182)
Ovary	183	Malignant neoplasm of ovary	C56 (183.0)

Vital Statistics Report and ICD9 Categories before 1999		Vital Statistics Report and ICD10 Categories 1999+ (ICD9 codes in parentheses*)	
Prostate	185	Malignant neoplasm of prostate	C61 (185)
		Malignant neoplasm of testis	C62 (186)
		Malignant neoplasm of bladder	C67 (188)
		Malignant neoplasms of kidney and renal pelvis	C64-C65 (189.0-189.1)
		Malignant neoplasms of meninges, brain and other parts of central nervous system	C70-C72 (191-192)
		Hodgkin's Disease	C81 (201)
Leukemia	204-208	Leukemia	C91-C95 (204-208)
All Other Malignant Sites			
		Blood and Blood-Forming Organs	D50-D89
Anemias	280-285	Anemias	D50-D64 (280-285)
Sickle Cell Trait and Disease	282.5-282.6	Sickle Cell Trait and Disease	282.5-282.6 (D57.0 - D57.3, D57.8, D58.2)
		Endocrine, Nutritional and Metabolic Diseases	E00-E90
Diabetes Mellitus	250	Diabetes mellitus	E10-E14 (250)
Mental Disorders	290-319	Mental and behavioral disorders	F00.0 - F99 (~290-319)
		Mental and behavioral disorders due to psychoactive substance use	F10.0 - F19.9 (291-293.9)
Diseases of the Nervous System & Sense Organs	320-389	Diseases of the nervous system	G00.0 - G99.8 (~320-359)**
Alzheimer's Disease	331	Alzheimer's disease	G30 (331.0)
Parkinson's Disease	332	Parkinson's disease	G20-G21 (332)
Multiple Sclerosis	340		
		Diseases of the Circulatory System	I00-I99
Cardiovascular Disease	390-448	Major cardiovascular diseases	I00-I78 (390-434, 436-448)

Vital Statistics Report and ICD9 Categories before 1999		Vital Statistics Report and ICD10 Categories 1999+ (ICD9 codes in parentheses*)	
		Essential (primary) hypertension and hypertensive renal disease	I10, I12 (401, 403)
		Diseases of Heart	I00-I09, I11, I13, I20-51 (390-398, 402, 404, 410-429)
		Acute rheumatic fever and chronic rheumatic heart diseases	I00-I09 (390-398)
Hypertensive Heart Disease	402	Hypertensive heart disease	I11 (402)
Ischemic Heart Disease	410-414	Ischemic heart disease	I20-I25 (410-414, 429.2)
Heart Attack-AMI	410	Acute myocardial infarction	I21-I22 (410)
		Other acute ischemic heart diseases	I24 (411)
		Other forms of chronic ischemic heart disease	I20, I25 (412-414, 429.2)
Other Forms of Heart Disease	420-429	Other heart disease	I26-I51 (415-429.1, 429.3-429.9)
Cerebrovascular Disease-Stroke	430-438	Cerebrovascular Disease	I60-I69 (430-434, 436-438)
Diseases of the Arteries and Capillaries	440-448	Atherosclerosis	I70 (440)
		Other diseases of circulatory system	I71-I78 (441-448)
		Aortic aneurysm and dissection	I71 (441)
Phlebitis	451		
Diseases of Respiratory System	460-519	Diseases of the respiratory system	J00 - J99.8 (~460-519)
Influenza and Pneumonia	480-487	Influenza and pneumonia	J10-J18 (480-487)
		Influenza	J10-J11 (487)
		Pneumonia	J12-J18 (480-486)
COPD	490-496	Chronic lower respiratory diseases	J40-J47 (490-494, 496)
Bronchitis and Chronic Unspecified	490-491	Bronchitis and Chronic Unspecified	J40-J42 (490-491)

Vital Statistics Report and ICD9 Categories before 1999		Vital Statistics Report and ICD10 Categories 1999+ (ICD9 codes in parentheses*)	
Emphysema	492	Emphysema	J43 (492)
Asthma	493	Asthma	J45-J46 (493)
Diseases of Digestive System	520-579	Diseases of digestive system	K00.0 - K93.8 (~520-579)
Chronic Liver Disease & Cirrhosis	571	Chronic liver disease and cirrhosis	K70, K73-K74 (571)
		Alcoholic liver disease	K70 (571.0-571.3)
		Diseases of the Genitourinary System	N00-N99
		Nephritis, nephrotic syndrome and nephrosis	N00-N07, N17-N19, N25-N27 (580-589)
Diseases of Urinary Tract	580-599	Infections of Kidney	N10-N12, N13.6, N15.1 (590)
Diseases of Genital Tract	600-629		
Diseases of Musculoskeletal System	710-739	Diseases of the musculoskeletal system and connective tissue	M00-M99 (~710-739)
Lupus Erythematosus	710		
Complications of Pregnancy, Childbirth & Puerperium	630-676	Pregnancy, childbirth and the puerperium	O00.0 - O99.8 (630-676)
Conditions Originating in the Perinatal Period	760-779	Certain conditions originating in the perinatal period	P00.0 - P96.9 (760-771.2, 771.4-779)
		Disorders related to length of gestation and fetal malnutrition	P05 - P08 (764-766)
Short Gestation and Low Birth Weight	765	Disorders related to short gestation and low birth weight, not elsewhere classified	P07 (765)
		Intrauterine hypoxia and birth asphyxia	P20 - P21 (768)
		Respiratory distress of newborn	P22 (769)
		Infections specific to the perinatal period	P35 - P39 (771.0-771.2, 771.4-771.8)
Congenital Anomalies	740-759	Congenital malformations, deformations and chromosomal abnormalities	Q00.0 - Q99.9 (740-759)

Vital Statistics Report and ICD9 Categories before 1999		Vital Statistics Report and ICD10 Categories 1999+ (ICD9 codes in parentheses*)	
		Congenital malformations of the nervous system	Q00-Q07
		Symptoms, Signs and Abnormal Clinical and Laboratory Findings	R00-R99
SIDS	798.0	SIDS	R95 (798.0)
Injury and Poisoning	E800-E999	External causes of morbidity	V01-Y97 (E800-E999)
		Accidents	V01-X59, Y85-Y86 (E800-E869, E880-E929)
Motor Vehicle Accidents	E810-E825	Motor vehicle accidents	V02-V04, V09.0, V09.2, V12-V14, V19.0-V19.2, V19.4-V19.6, V20-V79, V80.3-V80.5, V81.0-V81.1, V82.0-V82.1, V83-V86, V87.0-V87.8, V88.0-V88.8, V89.0, V89.2 (E810-E825)
Water Accidents	E830-E838		
Falls	E880-E888	Falls	W00-W19 (E880-E888)
Firearms	E922	Accidental discharge of firearms	W32-W34 (E922)
Drowning	E910	Accidental drowning and submersion	W65-W74 (E910)
Fires	E890-E899	Accidental exposure to smoke, fire and flames	X00-X09 (E890-E899)
Poisonings	E850	Accidental poisoning and exposure to noxious substances	X40-X49 (E850-E869, E924.1)
Suicides	E950-E959	Intentional self-harm (suicide)	X60-X84, Y87.0 (E950-E959)

Vital Statistics Report and ICD9 Categories before 1999		Vital Statistics Report and ICD10 Categories 1999+ (ICD9 codes in parentheses*)	
Homicides	E960- E969	Assault (homicide)	X85-Y09, Y87.1 (E960- E969)
Legal Intervention	E970- E978	Legal intervention	Y35, Y89.0 (E970-E978)
Machinery Accidents	E919		
All Other Accidents			

* Convention is that for example 123 means both '123' and 123.00 - 123.99. ~ = approximate range.

** (Diseases of Nervous System) 360-389 in icd9 (eye-related) have been moved to H series in icd10.
