Active Tuberculosis (TB) Treatment Plan: Bhutanese

1. **Steps to be Followed:**
   - All patients starting TB treatment will receive anti-TB medicines for at least 6 months, as per national guidelines.

2. **Treatment Plan:**
   - Patients will be reviewed every 2 months, and the continuation of treatment will be based on clinical response and radiographic improvement.

3. **Side Effects:**
   - Patients will be educated on the common side effects of anti-TB medications and advised to report any adverse effects immediately.

4. **Follow-up:**
   - Monthly tuberculosis case management meetings will be held to monitor treatment adherence and to address any concerns.

5. **Support Services:**
   - Psychosocial support services will be provided to patients and their families to address the social and emotional impacts of TB.

6. **Conclusion:**
   - The treatment plan is designed to ensure the successful completion of TB treatment and to prevent drug resistance.
