

SIGN UP FOR OUR FREE CLEAN WATER FOR GEORGIA KIDS PROGRAM!

We are pleased to announce that the Clean Water for Georgia Kids Program is ready to partner with schools and childcare centers across Georgia to **identify and get the lead out of drinking and cooking water** where children learn and play.

WHAT IS THIS?

This is a federally grant-funded program to test for lead in drinking and cooking water at schools and childcare centers, with participant training and recommendations for actions to eliminate or reduce lead in water. The Program is a partnership between The Georgia Department of Education and RTI International.

WHY IS THIS IMPORTANT?

There is no safe level of lead exposure. Lead service lines are not the only source of lead in water. Because there is an allowable amount of lead in piping and plumbing, including faucet fixtures and solder, the only way to identify and get the lead out of water is to test it at every tap used for drinking and cooking.

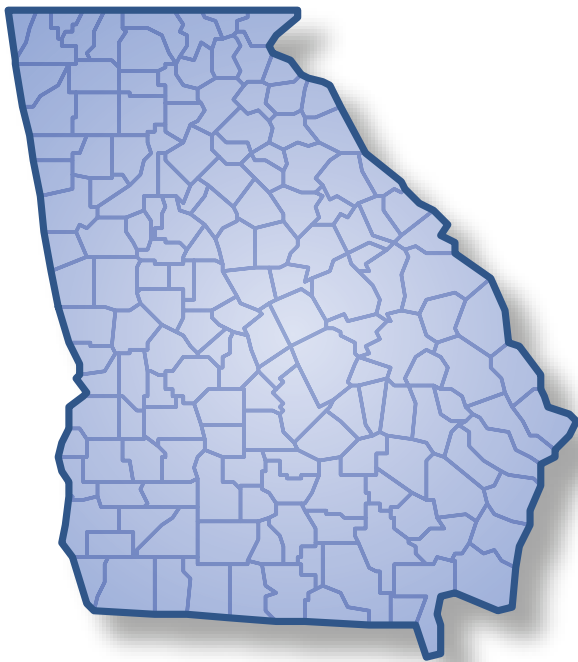

HOW DO I ENROLL MY SCHOOL?

To enroll, please register for one of the pre-enrollment webinars at <https://bit.ly/3hW66kN> and enroll at www.cleanwaterforUSkids.org/georgia. The webinar overviews 1) how to enroll, 2) how to sample, and 3) how to ship your samples back. At the end of the webinar, you will receive the enrollment code to register your center at www.cleanwaterforUSkids.org/georgia.

WHEN?

The program is open now for schools and licensed childcare programs across Georgia.

THANK YOU!

We appreciate your efforts to train, test, and take action to eliminate childhood exposure to lead in drinking and cooking water at schools across Georgia.
