Home Visiting Models

Program Highlights

89%

of caregivers were screened for depression within 3 months of enrollment or within 3 months of delivery.

97%

of children had a family member who read, told stories, and/or sang with them on a daily basis.

87%

of mothers received a postpartum visit with a healthcare provider within 8 weeks of delivery.

95%

of caregivers received intimate partner violence screening within 6 months of enrollment.

89%

of children practiced safe sleep and were always placed to sleep on their backs, without bed sharing or soft bedding.
