What is TB?
“TB” is short for a disease called Tuberculosis. TB can be treated and cured. If anyone has TB disease, they need medical help. If they don’t get help, they can die.

How is TB Spread?
TB is spread when a person with active TB disease coughs, sings, or speaks and you breathe in the TB germs.

How To Get Tested For TB?
You can get a skin test at the health department or doctor’s office to see if you have the TB germ.

How is TB Spread?
TB is spread when a person with active TB disease coughs, sings, or speaks and you breathe in the TB germs.

How is TB Disease Treated?
The only way to get well and stop spreading the TB germs is to take your medicine exactly as your doctor or nurse tells you.
Do you think you have TB?
How do you know?

You breathed in the TB germ and have:

✔ A bad cough for more than 2 weeks
✔ Fever or chills
✔ Weight loss
✔ Weakness
✔ No appetite
✔ Night sweats

What do you do?
Get a TB skin test. Don’t Delay!
