

# Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, July 2019

**What is Syndromic Surveillance (SS)?** SS is used as an early detection method for potential clusters or outbreaks, by tracking drug overdose-related emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

**Drug\* Overdose ED Visits by Patient Zip Code<sup>^</sup>, Georgia, July 2019**

**Percent Change<sup>a</sup> of Drug\* Overdose ED Visits, Georgia, February-April 2019 to May-July 2019**  
(compares previous 3 months to current 3 months)

**Top 5 Counties<sup>^</sup> with 15 or More Drug\* Overdose ED Visits During July 2019**

**Statewide, 1,247 ED visits for Drug\* overdoses occurred in July 2019, compared to 1,197 in July 2018**

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

\*Drugs may include any over the counter, prescription, or illicit drug.

<sup>^</sup>Zip code and county are based on patient residence.

<sup>i</sup>Rate indicates visits per 100,000 persons using 2018 Census data as the denominator. Excluded rates for counties with <15 visits.

<sup>a</sup>Percent change data by county excludes counties with less than 3 visits.

Note: All data excludes patients ≤14 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SS data is not the same as emergency department discharge data; drug overdose SS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.

# Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, July 2019

## Drug\* Overdose ED Visits by Month, Georgia, 2016-2019

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
<b>2016 Count of ED Visits</b>	1006	1081	1182	1240	1225	1319	1321	1292	1311	1366	1308	1167	14818
