*Among schools with students in that grade.

NA = Not available
3. Percentage of schools that require students who fail a required health education course to repeat it.*

*Among schools in which students take one or more required health education courses in any of grades 6 through 12.

NA = Not available
4. Percentage of schools in which those who teach health education are provided with each of the following materials.

- **a.** Goals, objectives, and expected outcomes for health education
  - High Schools: 91.9%
  - Middle Schools: 79.2%
  - Junior/Senior High Schools: 85.2%
  - All Schools: 85.2%

- **b.** A chart describing the annual scope and sequence of instruction for health education
  - High Schools: 68.2%
  - Middle Schools: 58.2%
  - Junior/Senior High Schools: 63.4%
  - All Schools: 71.5%

- **c.** Plans for how to assess student performance in health education
  - High Schools: 84.3%
  - Middle Schools: 61.2%
  - Junior/Senior High Schools: 71.5%
  - All Schools: 80.2%

- **d.** A written health education curriculum
  - High Schools: 80.2%
  - Middle Schools: 63.1%
  - Junior/Senior High Schools: 71.0%
  - All Schools: 71.0%

NA = Not available
5. Percentage of schools in which the health education curriculum addresses each of the following skills.

- **a.** Comprehending concepts related to health promotion and disease prevention to enhance health
  - High Schools: 86.1
  - Middle Schools: 81.3
  - Junior/Senior High Schools: 85.5
  - All Schools: 91.1

- **b.** Analyzing the influence of family, peers, culture, media, technology, and other factors on health behaviors
  - High Schools: 85.5
  - Middle Schools: 81.3
  - Junior/Senior High Schools: 88.0
  - All Schools: 90.8

- **c.** Accessing valid information and products and services to enhance health
  - High Schools: 81.3
  - Middle Schools: 84.9
  - Junior/Senior High Schools: 88.0
  - All Schools: 90.1

- **d.** Using interpersonal communication skills to enhance health and avoid or reduce health risks
  - High Schools: 81.3
  - Middle Schools: 84.9
  - Junior/Senior High Schools: 88.0
  - All Schools: 90.1

NA = Not available
5. Percentage of schools in which the health education curriculum addresses each of the following skills.

- Using decision-making skills to enhance health
- Using goal-setting skills to enhance health
- Practicing health-enhancing behaviors to avoid or reduce risks
- Advocating for personal, family, and community health

NA = Not available
6. Percentage of schools in which those who teach sexual health education are provided with each of the following materials.*

- a. Goals, objectives, and expected outcomes for sexual health education
  - High Schools: 77.9%
  - Middle Schools: 81.3%

- b. A written health education curriculum that includes objectives and content addressing sexual health education
  - High Schools: 74.6%
  - Middle Schools: 76.9%

- c. A chart describing the annual scope and sequence of instruction for sexual health education
  - High Schools: 55.5%
  - Middle Schools: 58.5%

- d. Strategies that are age-appropriate, relevant, and actively engage students in learning
  - High Schools: 77.8%
  - Middle Schools: 79.7%

- e. Methods to assess student knowledge and skills related to sexual health education
  - High Schools: 68.4%
  - Middle Schools: 75.3%

*Among schools that teach sexual health education.
NA = Not available
7. Percentage of schools that provide curricula or supplementary materials that include HIV, STD, or pregnancy prevention information that is relevant to lesbian, gay, bisexual, transgender, and questioning youth.
8. Percentage of schools in which health education instruction is required for students in any of grades 6 through 12.

- **All Schools**: 75.2%
- **Junior/Senior High Schools**: 94.3%
- **Middle Schools**: 59.6%
- **High Schools**: NA

NA = Not available
9. Percentage of schools in which teachers tried to increase student knowledge on each of the following topics in a required course in any of grades 6 through 12 during the current school year.
