

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, June 2024

What is Syndromic Surveillance (SyS)? SyS is used as an early detection method for potential clusters or outbreaks, by tracking suspected drug overdose-involved emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SyS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

Drug* Overdose ED Visits by Patient Zip Code[^],
Georgia, June 2024

Percent Changeⁿ of Drug* Overdose ED Visits,
Georgia, Jan 2024 - Mar 2024 to Apr 2024 - Jun 2024
(compares previous 3 months to current 3 months)

Top 5 Counties[^] with 15 or More Drug* Overdose ED Visits During June 2024

County	Monthly Rate ⁱ per 100,000 Population Jun 2024	Monthly Rate ⁱ per 100,000 Population Jul 2023 - Jun 2024
Bibb	33.1	
Richmond	32.3	
Whitfield	27.6	
Carroll	23.4	
Muscogee	22.4	

Thicker borders represent the
**5 highest county rates¹ of
Drug* overdose ED visits
per 100,000 population in
June 2024**
(see table below)

**Statewide,
1,506 ED visits for
Drug* overdoses
occurred in
June 2024,
compared to 1,602 in
June 2023.**

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

*Drugs may include any over the counter, prescription, or illicit drug.

[^]Zip code and county are based on patient residence.

ⁱRate indicates visits per 100,000 persons using 2023 Census data as the denominator. Excluded rates for counties with <15 visits.

ⁿPercent change data by county excludes counties with less than 3 visits.

*Drug Specific Categories are not mutually exclusive and include illicit and prescription drugs. Specific drugs identified using the chief complaint and/or discharge diagnosis fields and are not meant to be comprehensive.

Note: All data excludes patients ≤9 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SyS data is not the same as emergency department discharge data; drug overdose SyS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SyS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, June 2024

Drug* Overdose ED Visits by Month, Georgia, 2021-2024

Note: Proportion of ED visits may be affected by changes in the number of ED visits during COVID-19.

Drug* Overdose ED Visits by Sex, Race, and Age Group, Georgia, May 2023 and May 2024

Rate¹ of Drug* Overdose ED Visits

	Jun 2023 Rate ¹ (per 100,000 population)	Jun 2024 Rate ¹ (per 100,000 population)
Overall	16.5	15.5
Sex		
Female	15.3	14.6
Male	17.7	16.5
Race		
Black	14.2	14.3
White	16.9	14.9
Other	10.2	11.6
Age Group (years)		
10-14	8.2	5.9
15-24	17.3	16.0
25-34	24.0	20.3
35-44	23.3	22.7
45-54	16.0	15.2
55-64	13.0	14.3
65-74	11.6	11.0
75+	7.6	8.3

Drug* overdose ED visits in June 2024 were predominantly: Male (51.5%), White (57.0%), and between 35-44 years of age (22.2%).

Percent of All Drug* Overdose ED Visits by Age Group

10.3% increase in the count of Drug* overdoses among patients aged 55-64 when compared to June 2023.

Percent of All Drug* Overdose ED Visits by Sex and Race

7.0% decrease in the count of Drug* overdoses among Males when compared to June 2023.

11.5% decrease in the count of Drug* overdoses among White patients when compared to June 2023.

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

*Drugs may include any over the counter, prescription, or illicit drug.

¹Rate indicates visits per 100,000 persons using 2023 Census data as the denominator. Excluded rates for counties with <15 visits.

²Percent change data by county excludes counties with less than 3 visits.

*Drug Specific Categories are not mutually exclusive and include illicit and prescription drugs. Specific drugs identified using the chief complaint and/or discharge diagnosis fields and are not meant to be comprehensive.

Note: All data excludes patients ≤9 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SyS data is not the same as emergency department discharge data; drug overdose SyS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SyS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, June 2024

OD ED Visits by Month and Drug Type*, Georgia, July 2023 - June 2024

9.7% decrease in the count of drug overdose visits mentioning Fentanyl when compared to June 2023.

Note: Due to limitations with drug testing in EDs, Fentanyl and Stimulant categories are likely under-represented.
