

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, February 2022

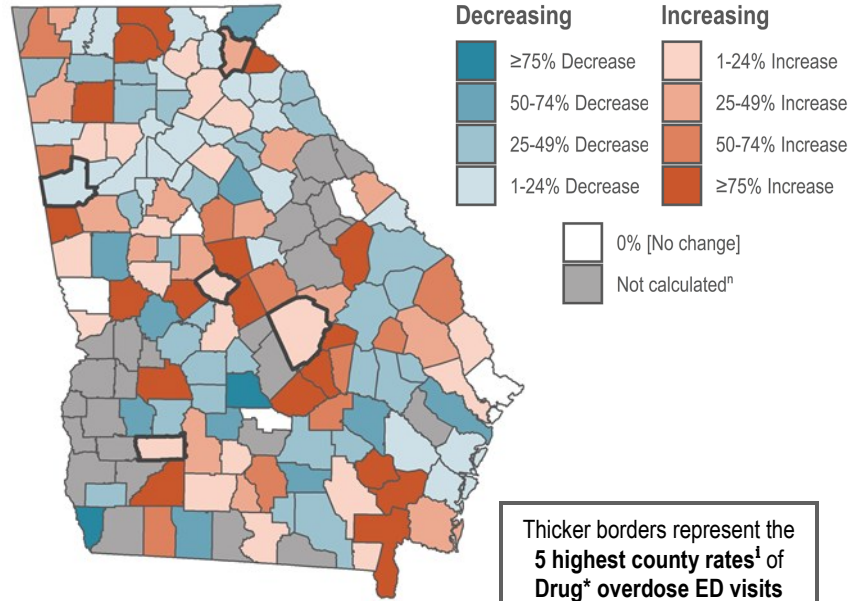

What is Syndromic Surveillance (SS)? SS is used as an early detection method for potential clusters or outbreaks, by tracking suspected drug overdose-involved emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

Drug* Overdose ED Visits by Patient Zip Code^A, Georgia, February 2022

Percent Changeⁿ of Drug* Overdose ED Visits, Georgia, Sep 2021 - Nov 2021 to Dec 2021 - Feb 2022

(compares previous 3 months to current 3 months)

Thicker borders represent the **5 highest county rates¹ of Drug* overdose ED visits per 100,000 population in February 2022** (see table below)

Top 5 Counties^A with 15 or More Drug* Overdose ED Visits During February 2022

County	Monthly Rate ⁱ per 100,000 Population Feb 2022	Monthly Rate ⁱ per 100,000 Population Mar 2021 - Feb 2022
Laurens	44.9	
Habersham	42.5	
Carroll	39.8	
Bibb	31.9	
Dougherty	30.2	

Statewide, 1,259 ED visits for Drug* overdoses occurred in February 2021, compared to 1,292 in February 2022.

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

*Drugs may include any over the counter, prescription, or illicit drug.

^AZip code and county are based on patient residence.

ⁱRate indicates visits per 100,000 persons using 2020 Census data as the denominator. Excluded rates for counties with <15 visits.

ⁿPercent change data by county excludes counties with less than 3 visits.

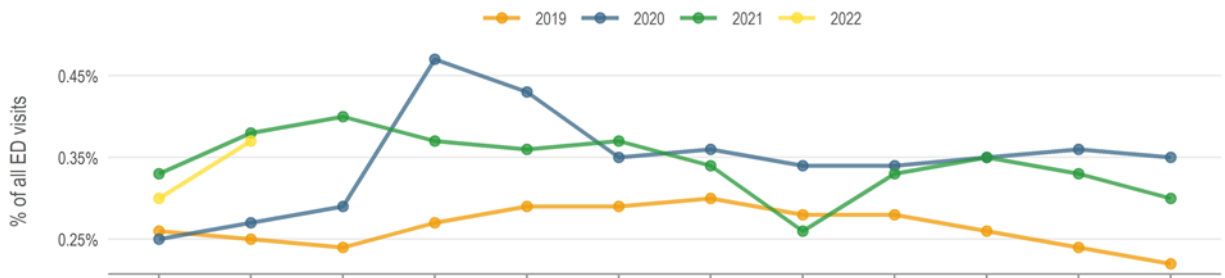

*Drug Specific Categories are not mutually exclusive and include illicit and prescription drugs. Specific drugs identified using the chief complaint and/or discharge diagnosis fields and are not meant to be comprehensive.

Note: All data excludes patients ≤14 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SS data is not the same as emergency department discharge data; drug overdose SS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, February 2022

Drug* Overdose ED Visits by Month, Georgia, 2019-2022

Note: Proportion of ED visits may be affected by changes in the number of ED visits during COVID-19.
