

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, May 2021

What is Syndromic Surveillance (SS)? SS is used as an early detection method for potential clusters or outbreaks, by tracking suspected drug overdose-involved emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

Drug* Overdose ED Visits by Patient Zip Code[^], Georgia, May 2021

Percent Change^a of Drug* Overdose ED Visits, Georgia, Dec 2020 - Feb 2021 to Mar 2021 - May 2021
(compares previous 3 months to current 3 months)

Thicker borders represent the **5 highest county rates¹** of Drug* overdose ED visits per 100,000 population in **May 2021** (see table below)

Top 5 Counties[^] with 15 or More Drug* Overdose ED Visits During May 2021

County	Monthly Rate ¹ per 100,000 Population	
	May 2021	Jun 2020 - May 2021
HABERSHAM	54.1	
SPALDING	35.4	
GLYNN	29.9	
COLUMBIA	29.8	
BIBB	29.5	

Statewide, 1,563 ED visits for Drug* overdoses occurred in May 2021, compared to 1,257 in May 2020

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

*Drugs may include any over the counter, prescription, or illicit drug.

[^]Zip code and county are based on patient residence.

¹Rate indicates visits per 100,000 persons using 2019 Census data as the denominator. Excluded rates for counties with <15 visits.

^aPercent change data by county excludes counties with less than 3 visits.

[‡]Drug Specific Categories are not mutually exclusive and include illicit and prescription drugs. Specific drugs identified using the chief complaint and/or discharge diagnosis fields and are not meant to be comprehensive.

Note: All data excludes patients ≤14 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SS data is not the same as emergency department discharge data; drug overdose SS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.
