

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, November 2020

What is Syndromic Surveillance (SS)? SS is used as an early detection method for potential clusters or outbreaks, by tracking suspected drug overdose-involved emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

Drug* Overdose ED Visits by Patient Zip Code[^], Georgia, November 2020

Percent Change^a of Drug* Overdose ED Visits, Georgia, Jun - Aug 2020 to Sep - Nov 2020
(compares previous 3 months to current 3 months)

Top 5 Counties[^] with 15 or More Drug* Overdose ED Visits During November 2020
Monthly Rate¹ per 100,000 Population
November 2020 Monthly Rate¹ per 100,000 Population
December 2019 - November 2020

**Statewide,
1,279 ED visits for
Drug* overdoses
occurred in
November 2020,
compared to 1,037 in
November 2019**

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).
*Drugs may include any over the counter, prescription, or illicit drug.
[^]Zip code and county are based on patient residence.
¹Rate indicates visits per 100,000 persons using 2019 Census data as the denominator. Excluded rates for counties with <15 visits.
^aPercent change data by county excludes counties with less than 3 visits.
Note: All data excludes patients ≤14 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.
Note: SS data is not the same as emergency department discharge data; drug overdose SS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.
