

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, April 2023

What is Syndromic Surveillance (SyS)? SyS is used as an early detection method for potential clusters or outbreaks, by tracking suspected drug overdose-involved emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SyS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

Drug* Overdose ED Visits by Patient Zip Code[^],
Georgia, April 2023

Percent Change[^] of Drug* Overdose ED Visits,
Georgia, Nov 2022 - Jan 2023 to Feb 2023 - Apr 2023
(compares previous 3 months to current 3 months)

Top 5 Counties[^] with 15 or More Drug* Overdose ED Visits During April 2023

County	Monthly Rate ⁱ per 100,000 Population Apr 2023	Monthly Rate ⁱ per 100,000 Population May 2022 - Apr 2023
Polk	43.3	
Richmond	38.1	
Gordon	36.0	
Liberty	30.1	
Whitfield	28.1	

Thicker borders represent the
**5 highest county ratesⁱ of
Drug* overdose ED visits
per 100,000 population in
April 2023**
(see table below)

**Statewide,
1,456 ED visits for
Drug* overdoses
occurred in
April 2023,
compared to 1,509 in
April 2022.**

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

*Drugs may include any over the counter, prescription, or illicit drug.

[^]Zip code and county are based on patient residence.

ⁱRate indicates visits per 100,000 persons using 2021 Census data as the denominator. Excluded rates for counties with <15 visits.

[^]Percent change data by county excludes counties with less than 3 visits.

*Drug Specific Categories are not mutually exclusive and include illicit and prescription drugs. Specific drugs identified using the chief complaint and/or discharge diagnosis fields and are not meant to be comprehensive.

Note: All data excludes patients ≤9 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SyS data is not the same as emergency department discharge data; drug overdose SyS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SyS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, April 2023

Drug* Overdose ED Visits by Month, Georgia, 2020-2023

Note: Proportion of ED visits may be affected by changes in the number of ED visits during COVID-19.
