

# Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, June 2023

**What is Syndromic Surveillance (SyS)?** SyS is used as an early detection method for potential clusters or outbreaks, by tracking suspected drug overdose-involved emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SyS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

Drug\* Overdose ED Visits by Patient Zip Code<sup>^</sup>,  
Georgia, June 2023

**June 2023,**  
**compared to 1,522 in**  
**June 2022.**

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

\*Drugs may include any over the counter, prescription, or illicit drug.

<sup>^</sup>Zip code and county are based on patient residence.

<sup>i</sup>Rate indicates visits per 100,000 persons using 2021 Census data as the denominator. Excluded rates for counties with <15 visits.

<sup>n</sup>Percent change data by county excludes counties with less than 3 visits.

\*Drug Specific Categories are not mutually exclusive and include illicit and prescription drugs. Specific drugs identified using the chief complaint and/or discharge diagnosis fields and are not meant to be comprehensive.

Note: All data excludes patients ≤9 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SyS data is not the same as emergency department discharge data; drug overdose SyS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SyS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.
