

# Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, November 2019

**What is Syndromic Surveillance (SS)?** SS is used as an early detection method for potential clusters or outbreaks, by tracking drug overdose-related emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

**Drug\* Overdose ED Visits by Patient Zip Code<sup>^</sup>, Georgia, November 2019**

**Percent Change<sup>a</sup> of Drug\* Overdose ED Visits, Georgia, June-August 2019 to September-November 2019**  
(compares previous 3 months to current 3 months)

**Top 5 Counties<sup>^</sup> with 15 or More Drug\* Overdose ED Visits During November 2019**

County	Monthly Rate <sup>i</sup> per 100,000 Population	
	November 2019	December 2018 - November 2019
DOUGHERTY	34.0	
FLOYD	30.3	
BIBB	25.5	
LOWNDES	24.8	
HOUSTON	22.9	

**Statewide, 1,037 ED visits for Drug\* overdoses occurred in November 2019, compared to 1,076 in November 2018**

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).  
 \*Drugs may include any over the counter, prescription, or illicit drug.  
<sup>^</sup>Zip code and county are based on patient residence.  
<sup>i</sup>Rate indicates visits per 100,000 persons using 2018 Census data as the denominator. Excluded rates for counties with <15 visits.  
<sup>a</sup>Percent change data by county excludes counties with less than 3 visits.  
 Note: All data excludes patients ≤14 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.  
 Note: SS data is not the same as emergency department discharge data; drug overdose SS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.
