

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, October 2019

What is Syndromic Surveillance (SS)? SS is used as an early detection method for potential clusters or outbreaks, by tracking drug overdose-related emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. Participating Georgia hospitals and urgent care facilities share these SS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

Drug* Overdose ED Visits by Patient Zip Code[^], Georgia, October 2019

Percent Change^a of Drug* Overdose ED Visits, Georgia, May-July 2019 to August-October 2019
(compares previous 3 months to current 3 months)

Top 5 Counties[^] with 15 or More Drug* Overdose ED Visits During October 2019

County	Monthly Rate ⁱ per 100,000 Population	
	October 2019	November 2018 - October 2019
SPALDING	30.1	
CARROLL	27.4	
DOUGHERTY	27.2	
RICHMOND	26.4	
BARTOW	25.8	

Statewide, 1,139 ED visits for Drug* overdoses occurred in October 2019, compared to 1,109 in October 2018

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

*Drugs may include any over the counter, prescription, or illicit drug.

[^]Zip code and county are based on patient residence.

ⁱRate indicates visits per 100,000 persons using 2018 Census data as the denominator. Excluded rates for counties with <15 visits.

^aPercent change data by county excludes counties with less than 3 visits.

Note: All data excludes patients ≤14 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SS data is not the same as emergency department discharge data; drug overdose SS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SS. Data is subject to change due to the current number of participating facilities and/or improvements to data quality. Data shown on this report may not depict the true burden of drug overdose in Georgia.
