Georgia Prescription Drug Monitoring Program (PDMP) Monthly Report—November 2022

<u>What is the PDMP?</u> The PDMP is an electronic database used to collect, monitor, and analyze prescribing and dispensing data about controlled substances (such as opioids, benzodiazepines and stimulants) in Georgia. The PDMP collects details of every Schedule II – V prescription drug order dispensed in Georgia. The purpose of this report is to describe opioid prescribing patterns in Georgia on a monthly basis. For more information on the PDMP and the indicators included in this report, please refer to pages 2-7 of the most recent PDMP annual report here.

Disclaimer: The data in this report increased when compared to the previous reports due to changes in the reporting process. PDMP surveillance reports prior to January 2022 should not be compared with reports after January 2022.

Prescriptions by Drug Type & Year, Georgia, 2016-2021

From 2020 to 2021, the number of opioid prescriptions decreased by 8%, benzodiazepine prescriptions by 14%, and stimulant prescriptions by 8%.

Prescriptions by Drug Type & Month, Georgia, 2021-2022
