Field Level Notes for Form 10 SPMs:

1. **Field Name:** 2016

Column Name: State Provided Data

Field Note:

Data Source; OHIP Hospital Discharge Data, Vital Records

Method: The numerator is the number of infants younger than 1 year of age diagnosed with NAS in Georgia. Diagnosis was defined using ICD codes. For the first three quarters of 2015, NAS was indicated by ICD-9 codes of 779.5 (drug withdrawal syndrome in a newborn) and 760.72 (narcotics affecting fetus or newborn via placenta or breast milk). For the last quarter of 2015, the ICD-10 codes P96.1 (neonatal withdrawal symptoms from maternal use of drugs of addiction) and P04.4 (newborn affected by maternal use of drugs of addiction) were used. Iatrogenic cases were identified and removed from consideration using Stephen Patrick's methodology as described in "Neonatal Abstinence Syndrome and Associated Health Care Expenditures." The denominator is the total number of hospital births in Georgia.

2. **Field Name:** 2017

Column Name: State Provided Data

Field Note:

Neonatal Abstinence Syndrome (NAS) became a reportable condition in Georgia in 2016. With the rise of opioid use, there has been an increase in NAS education and outreach to increase public awareness. Excluding military facilities and two stand-alone birthing hospitals that do not report the hospital discharge data, approximately 90% of the 76 birthing hospitals reported at least 1 baby with a NAS-related ICD code.

SPM 5 - Percent of birthing hospitals, NICUs, and Pediatric Departments with policies and education that adhere to the American Academy of Pediatrics (AAP) Safe Sleep guidelines

Measure Status:				Active		
Annual Objectives						
	2019	2020	2021	2022	2023	2024
Annual Objective	51.1	52.5	53.9	55.3	56.7	58.2

Field Level Notes for Form 10 SPMs:

1.	Field Name:	2019
	Column Name:	Annual Objective

Field Note:

Provisional data as of June 2018, there are 141 birthing hospitals, NICUs, and specialty departments. Of which, 70 have verified AAP Safe Sleep guidelines/policies.
