

Project ECHO (Extension for Community Healthcare Outcomes) demonopolizes knowledge and amplifies local capacity to provide best practice care for rural and underserved communities.

Project ECHO is a movement to spread knowledge, expand capacity and accelerate collective wisdom.

Moving Knowledge Not People

This low-cost, high-impact intervention is accomplished by linking inter-disciplinary specialist teams with multiple primary care clinicians through teleECHO™ programs. Experts mentor and share their expertise across a virtual network via case-based learning, enabling primary care clinicians to treat patients with complex conditions in their own communities.

People get the high-quality care they need, when they need it, close to home.

What is the ECHO Model™?

1. Use technology to leverage scarce resources
2. Share “best practices” to reduce disparities
3. Apply case-based learning to master complexity
4. Evaluate and monitor outcomes

Benefits of Becoming a Partner in the ECHO Movement

- Better access for rural and underserved communities
- Reduced disparities
- Better quality and safety
- Rapid dissemination of best practices
- Promote consistency in care or practice
- Greater efficiency

Benefits of Participating in a TeleECHO Program

ECHO partners acquire new skills and competencies. They become part of a community of practice and learning. Increasing their professional satisfaction while their feelings of professional isolation decrease.
