

NOTIFIABLE DISEASE CONDITION REPORTING

All Georgia physicians, laboratories, and other health care providers are required by law to report patients with the following conditions.

REPORT IMMEDIATELY	REPORT WITHIN 7 DAYS
<p>To Report Immediately Call: District Health Office or 1-866-PUB-HLTH (1-866-782-4584)</p> <ul style="list-style-type: none"> any cluster of illness animal bites ▶ anthrax all acute arboviral infections* ▶ botulism ▶ brucellosis cholera diphtheria <i>E. coli</i> 0157 <i>Haemophilus influenzae</i> (invasive)+ hantavirus pulmonary syndrome hemolytic uremic syndrome (HUS) hepatitis A (acute) measles (rubeola) ▶ melioidosis meningitis (specify agent) meningococcal disease (invasive) novel influenza A virus infections novel respiratory viruses (SARS, MERS, etc.) positive lab results <p>▶ <i>Potential agent of bioterrorism.</i> + Invasive = isolated from blood, bone, CSF, joint, pericardial, peritoneal, or pleural fluid.</p>	<ul style="list-style-type: none"> ▶ orthopoxviruses (smallpox, monkeypox) pertussis ▶ plague poliomyelitis ▶ Q fever rabies (human + animal) SARS-CoV-2 (COVID-19) positive lab results from point of care (rapid) antigen or molecular tests positive lab results nucleic acid amplification test (e.g., RT-PCR, etc.) results from laboratories certified under CLIA to perform moderate- or high-complexity tests shiga toxin positive test <i>S. aureus</i> with vancomycin MIC ≥ 4 mcg / mL syphilis (adult) syphilis during pregnancy tuberculosis latent TB infection in children < 5 years old ▶ tularemia ▶ viral hemorrhagic fevers
REPORT WITHIN 1 MONTH	<ul style="list-style-type: none"> AIDS# acute flaccid myelitis anaplasmosis aseptic meningitis babesiosis blood lead level (all) campylobacteriosis Carbapenem-resistant Enterobacteriaceae (CRE): Enterobacter species, Escherichia coli, and Klebsiella species chancroid Chlamydia trachomatis (genital infection) Creutzfeldt-Jakob Disease (CJD), suspected cases, under age 55 cryptosporidiosis cyclosporiasis ehrlichiosis giardiasis gonorrhea HIV infection# Perinatal HIV exposure# hearing impairment (permanent under age 5)## hepatitis B <ul style="list-style-type: none"> - acute hepatitis B - chronic HBsAg(+) or HBV DNA detected infections - HBsAg(+) pregnant women - Perinatal HBV exposure hepatitis C (past or present) <ul style="list-style-type: none"> - anti-HCV(+) - HCV RNA detected - HCV genotype detected - anti-HCV(+) or HCV RNA detected pregnant women - anti-HCV(+) or HCV RNA detected children ages <3 years hepatitis D (Delta virus present with HBsAg); acute and chronic hepatitis E (acute) influenza-associated death (all ages) legionellosis leptospirosis listeriosis*** leprosy or Hansen's disease (<i>Mycobacterium leprae</i>) Lyme disease lymphogranuloma venereum malaria maternal deaths (during pregnancy or within 1 year of end of pregnancy)## MIS-C (multi-system inflammatory syndrome in children) mumps psittacosis Rocky Mountain spotted fever rubella (including congenital) salmonellosis shigellosis streptococcal disease, Group A or B (invasive)** Streptococcus pneumoniae (invasive)** <ul style="list-style-type: none"> - report with antibiotic-resistance information tetanus toxic shock syndrome typhoid Varicella (Chickenpox) Vibrio infections yersiniosis <p>REPORT CASES ELECTRONICALLY THROUGH THE STATE ELECTRONIC NOTIFIABLE DISEASE SURVEILLANCE SYSTEM AT http://sendss.state.ga.us</p> <p>* California serogroup virus diseases (including: California encephalitis, Jamestown Canyon, Keystone, La Crosse, Snowshoe hare, Trivittatus virus), Chikungunya Virus Disease, Eastern equine encephalitis virus disease, Powassan virus disease, St. Louis encephalitis virus disease, West Nile virus disease, Western equine encephalitis virus disease, Zika Virus Disease</p> <p>** Invasive = isolated from blood, bone, CSF, joint, pericardial, peritoneal, or pleural fluid.</p> <p>*** L. monocytogenes isolated from blood, bone, CSF, joint, pericardial, peritoneal, or pleural fluid, or other normally sterile site; or from placenta or products of conception in conjunction with fetal death or illness. Infant mortality is reportable to Vital Records.</p> <p>REPORTING FOR OTHER CONDITIONS:</p> <p># Report forms and reporting information for HIV/AIDS available by phone (1-800-827-9769) OR online (dph.georgia.gov/georgias-hiv-aids-epidemiology-surveillance-section). For mailing HIV/AIDS reports, please use double envelopes marked "confidential", addressed to Georgia Department of Public Health Epidemiology Section, P.O. Box 2107, Atlanta, GA 30301</p> <p>## Report forms and reporting information for maternal deaths and hearing impairment (permanent, under age 5) available at dph.georgia.gov/documents/forms-surveys-and-documents.</p>
REPORT WITHIN 6 MONTHS	
<p>Birth Defects, including fetal deaths of at least 20 weeks gestational age and children under age 6. Information for reporting birth defects is available at dph.georgia.gov/birth-defects-reporting.</p> <p>Healthcare-associated Infections (HAIs) For facilities required to report HAI data to CMS via NHSN. Report in accordance with the NHSN protocol. Reporting requirements and information available at dph.georgia.gov/notifiable-hai-reporting.</p> <p>Neonatal Abstinence Syndrome (NAS) Information for reporting NAS is available at dph.georgia.gov/nas.</p> <p>Benign brain and central nervous system tumors</p> <p>Cancer</p> <p>Report forms and reporting information for tumors and cancer is available at dph.georgia.gov/georgia-comprehensive-cancer-registry.</p>

SUBMISSION REQUIREMENTS FOR CLINICAL MATERIALS

The table below details notifiable diseases for which clinical materials are to be submitted to the Georgia Public Health Laboratory

DISEASES AND CONDITIONS	SUBMIT CLINICAL MATERIALS ¹
anthrax (<i>Bacillus anthracis</i>)	All reported cases
botulism (<i>Clostridium botulinum</i>)	All reported cases
brucellosis (<i>Brucella</i> spp.)	All reported cases
campylobacteriosis (<i>Campylobacter</i> spp.)	All reported cases
Carbapenem-resistant Enterobacteriaceae: <i>Enterobacter</i> species, <i>Escherichia coli</i> , <i>Klebsiella</i> species	All reported cases
cholera (<i>Vibrio cholerae</i>)	All reported cases
cyclosporiasis (<i>Cyclospora</i> spp.)	All reported cases
dengue	All reported cases
diphtheria (<i>Corynebacterium diphtheriae</i>)	All reported cases
<i>E. coli</i> O157	All reported cases
gonorrhea (<i>Neisseria gonorrhoeae</i> infections)	Send invasive ² specimens
<i>Haemophilus influenzae</i> (all invasive disease)	All reported cases
influenza (unusual case incidence, critical illness or death, suspect Novel)	All reported cases
Influenza A (unable to subtype)	All reported cases
listeriosis (<i>Listeria monocytogenes</i>)	All reported cases
malaria (<i>Plasmodium</i> spp.)	All reported cases
measles (rubeola)	All reported cases
meningococcal disease (<i>Neisseria meningitidis</i>) (all invasive disease)	All reported cases
novel influenza A virus infections	All reported cases
orthopoxviruses (smallpox, monkeypox)	All reported cases
plague (<i>Yersinia pestis</i>)	All reported cases
poliomyelitis	All reported cases
Q fever (<i>Coxiella burnetii</i>)	All reported cases
rubella (including congenital)	All reported cases
salmonellosis, including typhoid (<i>Salmonella</i> spp.)	All reported cases
severe acute respiratory syndrome (SARS)	All reported cases
shiga toxin positive tests	All reported cases
shigellosis (<i>Shigella</i> spp.)	All reported cases
tuberculosis (<i>Mycobacterium tuberculosis</i> complex); pulmonary or extrapulmonary sites of disease	All reported cases
tularemia (<i>Francisella tularensis</i>)	All reported cases
Typhoid	All reported cases
<i>Vibrio</i> spp	All reported cases
Viral hemorrhagic fevers	All reported cases
yersiniosis, enteric (<i>Yersinia</i> spp.)	All reported cases
DISEASES AND CONDITIONS	SUBMIT CLINICAL MATERIALS UPON REQUEST
cryptosporidiosis (<i>Cryptosporidium</i> spp.)	Hold 7 days and submit if DPH requests
hemolytic uremic syndrome	Hold 7 days and submit if DPH requests
mumps	Hold 7 days and submit if DPH requests
legionellosis (<i>Legionella</i> spp.)	Hold 7 days and submit if DPH requests
novel respiratory viruses	Hold 7 days and submit if DPH requests
pertussis (<i>Bordetella pertussis</i>)	Hold 7 days and submit if DPH requests
<i>S. aureus</i> with vancomycin MIC $\geq 4\mu\text{g/ml}$	Hold 7 days and submit if DPH requests
Streptococcal infections, Group A or B (all invasive disease)	Hold 7 days and submit if DPH requests
<i>Streptococcus pneumoniae</i> (all invasive disease)	Hold 7 days and submit if DPH requests
varicella-zoster virus (chickenpox or shingles)	Hold 7 days and submit if DPH requests
DISEASES AND CONDITIONS	SUBMIT CLINICAL MATERIALS WITH PRIOR APPROVAL
all acute arborviral infections	DPH does not routinely test but submission may occur upon DPH approval
hantavirus pulmonary syndrome	
rabies (animal and human cases and suspected cases)	

¹ “Clinical materials” is defined as: **A.** a clinical isolate containing the infectious agent for which submission of material is required; or **B.** if an isolate is not available, material containing the infectious agent for which submission of material is required, in the following order of preference: **(1)** a patient specimen; **(2)** nucleic acid; or **(3)** other laboratory material.

² “Invasive disease” is defined as: isolated from blood, bone, CSF, joint, pericardial, peritoneal, or pleural fluid.
