Asthma is a common and costly disease. Secondhand smoke can trigger and worsen asthma attacks and symptoms in youth and adults. Appropriate disease management and avoidance of triggers can reduce the burden of asthma.

**ASTHMA PREVALENCE**

- Approximately 230,000 (10%) children in Georgia have asthma.
- Approximately 41,000 (11%) middle school students in Georgia have asthma.
- Approximately 44,000 (10%) high school students in Georgia have asthma.
- Approximately 524,000 (8%) adults in Georgia have asthma.

**SECONDHAND SMOKE\(^1\) EXPOSURE**

- Approximately two-thirds of middle school students and three-fourths of high school students are exposed\(^2\) to secondhand smoke, regardless of asthma status.

**CIGARETTE SMOKING PREVALENCE**

- Approximately 23,000 (6%) middle school students and 81,000 (19%) high school students in Georgia smoke cigarettes.
- Approximately 1.3 million (19%) adults in Georgia smoke cigarettes.

**CIGARETTE SMOKING AND ASTHMA**

- Approximately 8% of middle school students with asthma and 19% of high school students with asthma smoke cigarettes.
- Approximately 24% of adult Georgians with asthma smoke cigarettes.

---

1. Secondhand smoke (SHS) is the combination of the smoke given off by the burning end of a cigarette, cigar, or pipe and the smoke exhaled by smokers.
2. Youth exposed to SHS at home, in a room, in a car, and through friends who smoke.
HEALTH BURDEN

- There were more than 49,000 visits to the emergency room and over 10,000 hospitalizations for asthma in Georgia in 2006.
- Emergency room visits and hospitalization rates are highest among children ages four and under.
- On average, from 2001 to 2006, there were 116 asthma deaths per year.

Know the common triggers

Exposure to the following environmental irritants and allergens can cause an asthma attack:

- Tobacco smoke
- Dust mites
- Pets (animal dander)
- Cockroaches
- Fungi and molds (indoor and outdoor)

Take control of asthma

- Reduce exposure to your triggers.
- Work with your doctor to create an asthma management plan.
- Monitor your breathing and airways with a peak flow meter, as recommended by your doctor.
- Treat symptoms early.
- Learn when to seek medical help.

Create an asthma management plan

An asthma management plan is a written guide set up by your doctor and you to help manage your asthma, based on your individual needs.

Your plan will tell you:

- What brings on your asthma symptoms.
- How to avoid triggers and reduce exposure.
- What medicines to take and when to take them.
- When you need to seek medical help.

Tips for using an asthma management plan:

- Go over each step of the plan with your doctor.
- Understand instructions for medications.
- Learn to use equipment, such as nebulizers, properly.
- Schedule routine visits to discuss your asthma with your doctor.
- Let your doctor know if your plan is not working, so that the plan can be revised as needed.

ASTHMA PREVENTION and EXPOSURE TO TOBACCO SMOKE

- Despite the fact that smoking may trigger asthma attacks, youth and adults with asthma continue to smoke.
- Exposure to secondhand smoke increases the frequency and severity of asthma attacks.
- Stopping smoking and limiting exposure to secondhand smoke can help reduce the frequency and severity of asthma attacks.
