What is a Community Health Needs Assessment?

- A systematic way of identifying needs and resources by
  - Gathering statistical data
  - Soliciting perspectives from community members
  - Collecting information about community resources
- Both a product (baseline data that can be used to track changes) and
- A process (in which community members/partners get invested in planning change)
How do CHNAs fit in with public health?

What do we learn?

- The main health concerns in a community
- The main reasons for these concerns
- The strengths/assets in the community
- Where we might want to intervene to create change
Purposes

- Identify needs of target population
- Identify additional resources and assets
- Identify organizations that may help meet needs or provide resources
- Establish program priorities, goals, and objectives
- Provide baseline for an evaluation
- Provide a systematic basis for which organizational decisions are made
- Create awareness of a community concern or problem
- Serve as a public relations tool
- Public health department accreditation requirement
- ACA requirement for hospitals
Phases of CHNA

- Assessment Planning
- Data Collection and Analysis
- Program Action Planning
Phase 3: Post-assessment

- Set priorities on needs
- Consider range of solutions
- Develop action plan to implement
- Evaluate the CHNA
- Communicate results
Major Assessment Models and Approaches

• MAPP: Mobilizing for Action through Planning and Partnerships
• CHANGE tool: Community Health Assessment and Group Evaluation
• Health Impact Assessment
• PhotoVoice
• Rapid Needs Assessment
• PRECEDE-PROCEED
Developing the action plan

- Cancer Institute’s Research-Tested Intervention Programs
- CDC
- Community Guide
- Community Toolbox
- Intervention Mapping
- National Prevention Strategy
- The Center for Training and Research Translation

COMMUNITY HEALTH ASSESSMENT PROCESS - NEWTON

- Mobilizing for Action through Planning and Partnerships (MAPP) – community driven strategic planning process.
- MAPP Core Team: Health Department, Newton Medical Center, Newton Partnership, Newton County Public Schools, Newton View Point Health (behavioral and mental health).
- Data collected through 3 community meetings, community stakeholder interviews, a youth survey, and a “Forces of Change” assessment.
CHA – NEwTON FOoD DESERT

- 25,557 Newton County residents (including 7,521 children and 2,194 seniors) had low access to a grocery store in 2010.
- An estimated 619 households had no car and low access to a grocery store.
- 58% of all restaurants are fast food compared to national average of 27%.
- About 9% of low-income residents had low access to a grocery store compared to 6% nationwide.
- The food desert exists in the central part of the county, and includes the cities of Oxford, Porterdale, and part of Covington.
Green shows the area where a significant number of residents are 10 miles away from the nearest grocery store.

CHOOSING NEWTON FOR FOOD ACCESS

- The academic connection with Oxford College was critical to the food access program.
  - Food Desert Research Team
  - Currently gathering data through key informant interviews in Newton County

- The GNR Health Department has staff, the Health Promotion Coordinator, that has connections to these key players.

- The data gathered from the key informant interviews will allow for evidence-based decision making in our strategic plan.
CHALLENGES IN NEWTON COUNTY

- Farmers markets and community gardens have faced severe barriers and ultimately failed

- Transportation:
  - Low-income community members don’t have access to cars
  - There is no public transportation

- Participation: farmers will not participate in markets because they are not lucrative business opportunities

- Cost: farmers markets can be expensive
  - Currently no SNAP benefits for markets

- Education: knowing how to prepare and cook vegetables and fruits in a healthy way
COMMUNITY GARDENS, FARMERS MARKETS & FOOD PANTRIES

- There are 2 community gardens in Newton County.
  - Porterdale Community Garden
  - Washington Street Community Center – Project Thrive

- There are currently 11 food pantries in the county.

- There is one “farmers market” in Oxford.
  - Produce stand

  - Project Thrive
GLEANING PROGRAM

- Glean definition: to gather leftover produce after a harvest
- Partners:
  - Oxford College Organic Farm
  - Solid Rock Baptist Church – Willing Helpers Food Pantry
- Program description: The Health Department and Oxford College will assemble student volunteers to glean the Oxford farm and transport the excess produce to the Willing Helpers Food Pantry.
- Future goals:
  - Add a food education component
  - Create a gleaning calendar by including other surrounding farms
Local Foods, Local Places helps communities create walkable, healthy, economically vibrant neighborhoods through the development of local food systems. The program is supported by EPA, the U.S. Department of Agriculture (USDA), the Centers for Disease Control and Prevention (CDC), the U.S. Department of Transportation (DOT), the Appalachian Regional Commission (ARC), the Delta Regional Authority (DRA), and the White House Rural Council.
Local Foods, Local Places
2014 - 2015

LOCAL FOODS, LOCAL PLACES
APPLICATION

Submitted September 15, 2015 on behalf of The City of Oxford.

Local Foods, Local Places aims to:

- Boost economic opportunities for local farmers and businesses.
- Improve access to healthy local food and promote childhood wellness.
- Create walkable, healthy, economically vibrant neighborhoods.
Thank you for your time!
