

Georgia Influenza Weekly Summary Report – 2012/2013 Season CDC week 41 (Updated 10/19/2012)

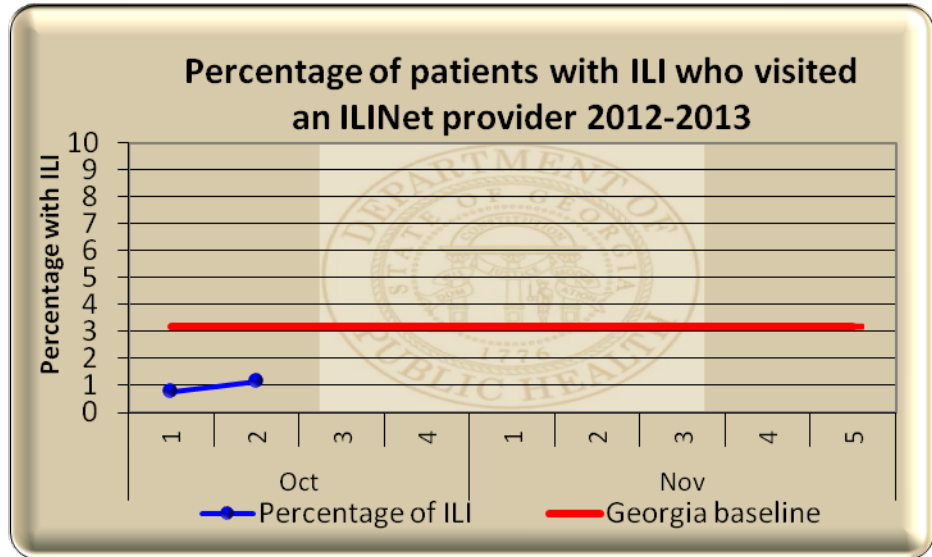

Percentage of patients with ILI reported by ILINet providers

(Volunteer providers who report percentage of patients with ILI seen by their practice or facility weekly. This week there are currently **27 of 82** ILINet providers reporting in Georgia.)

We are recruiting sentinels year-round. If you would like to become a sentinel provider, please contact your district health office.

ILINet patient visits by age group

For week 41 (ending Oct. 13, 2011), **1.16%** (↑ **.39%**) of patient visits to ILINet providers were for influenza-like illness (ILI: fever $\geq 100^{\circ}$ F and cough and/or sore throat in the absence of a *known* cause other than influenza).

Note: The Georgia baseline is formulated by averaging ILI percentage during weeks of endemic activity determined by laboratory results for influenza.

Georgia Influenza Weekly Summary Report – 2012/2013 Season CDC week 41 (Updated 10/19/2012)

ILI Activity Level Indicator - ILINet
(This graph uses the proportion of outpatient visits for ILI to measure the ILI severity in Georgia.)

Council of State and Territorial Epidemiologists Report – Geographic Dispersion

(This graph reflects geographic dispersion. It is not an indicator of influenza severity)

Georgia Influenza Weekly Summary Report – 2012/2013 Season CDC week 41 (Updated 10/19/2012)

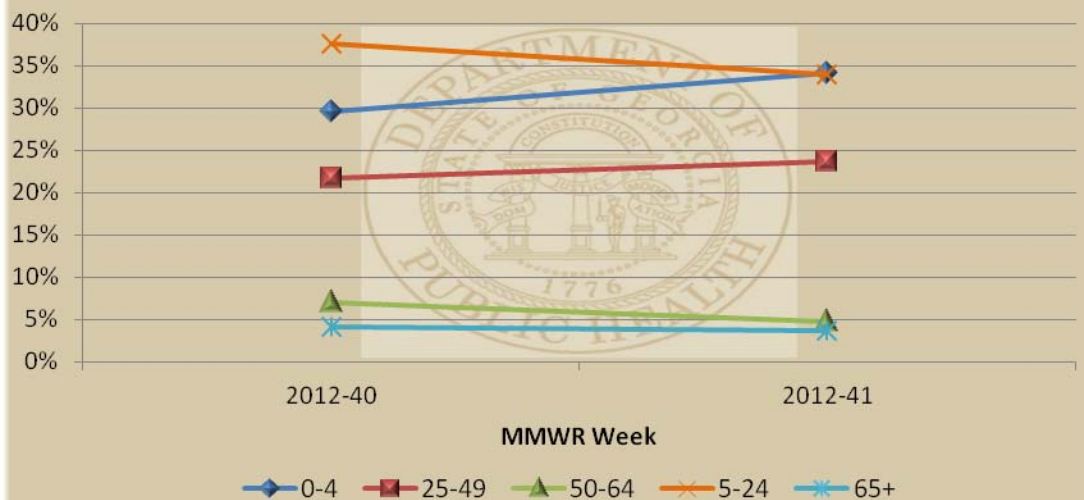

Syndromic Surveillance Data
Daily Influenza-like Illness Syndrome
(percentage of ILI visits)

Daily Percent of ILI Syndrome Visits to Georgia Emergency Departments
(Measured by ILI syndrome/ Total visits from Georgia Syndromic Surveillance Program emergency department chief complaint data)

Syndromic Surveillance Data
Weekly Influenza-like Illness Syndrome by Age Group
(Percentage of visits grouped into the ILI syndrome by age group)

Weekly Percentage of ILI Syndrome Visits by Age Group
2012/2013 Season

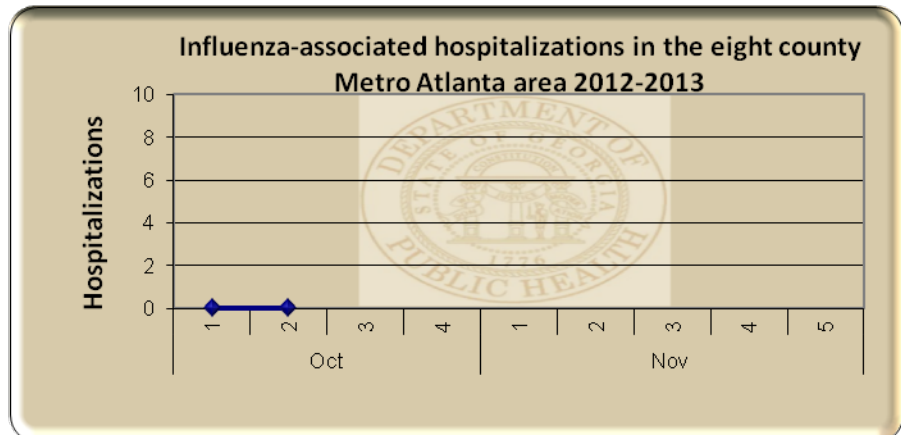

Georgia Influenza Weekly Summary Report – 2012/2013 Season CDC week 41 (Updated 10/19/2012)

Influenza Hospitalizations in the eight county metro Atlanta area 2012-2013 (Emerging Infections Program data)	Age Group		Number of Hospitalizations	
	0 – 4		0	
	5- 17		0	
	18 – 49		0	
	50 - 64		0	
	65 +		0	
	Total		0 (For confirmation, data are delayed.)	

Influenza Deaths 2012-2013 Statewide (Influenza-associated deaths are a notifiable condition in Georgia)	Age Group		Number of Deaths	
	0 – 4		0	
	5- 17		0	
	18 – 49		0	
	50 – 64		0	
	65 +		0	
	Total		0 (For confirmation, data are delayed.)	

Influenza-associated hospitalizations in the eight county metro Atlanta area
(Emerging Infections Program data)

Influenza-associated deaths reported to Public Health

Laboratory Data

Georgia Influenza Weekly Summary Report – 2012/2013 Season CDC week 41 (Updated 10/19/2012)

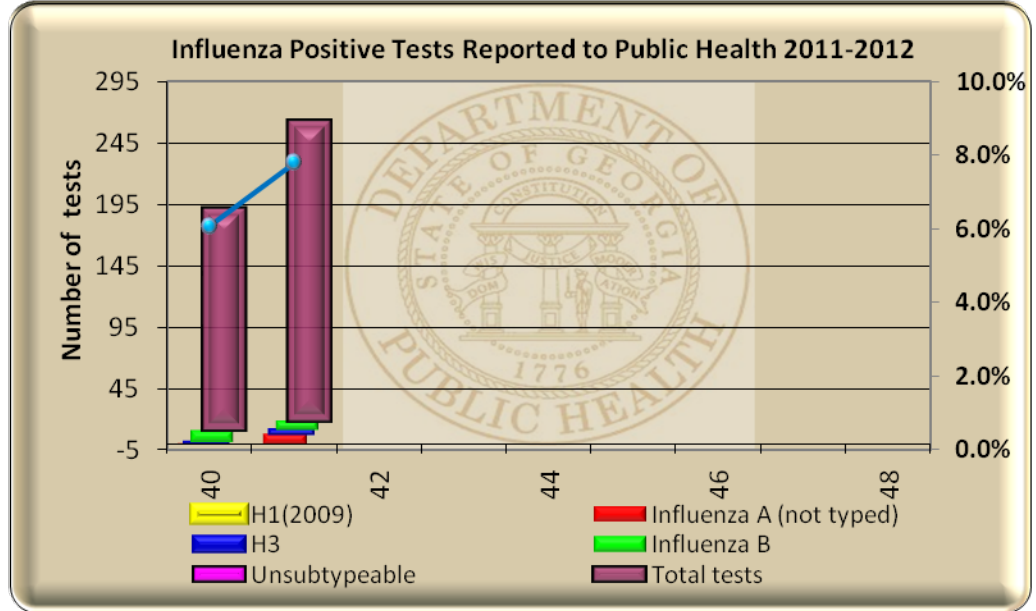

Note: Includes tests reported from reference Laboratories and the Georgia Public Health Laboratory; not all positive laboratory results for influenza are reported to Public Health.

0 Cases of H3N2v reported in Georgia as of 10/18/2012

Georgia threshold of RSV season onset and end

RSV season onset is defined as the first week of two (2) consecutive weeks when the **average** percent positive of **ALL** lab confirmed tests are greater than or equal to 10%. The end of RSV season is now defined as the first week of two consecutive weeks when the **average** percent positive of **ALL** lab confirmed tests are less than 10%.

RSV Season Status:
OFF
