GRITS is a “birth-to-death” web-based registry that keeps track of immunizations and related information for Georgians of all ages (i.e., children, adolescents and adults). The GRITS system includes a comprehensive database of immunization histories to help individuals get the immunizations they need by keeping track of all vaccines they have received so they don’t get double or triple doses. GRITS provides important immunization records and forms (i.e., 3231) for keeping track of immunizations.

For more information visit the Georgia Immunization Program website http://dph.georgia.gov/immunization-section or call 404-657-3158.
GRITS is a "birth-to-death" web-based registry that tracks childhood and adolescent immunization histories for Georgians of all ages (i.e., children, adolescents and adults). The GRITS system includes a comprehensive database of immunization records and related information for all Georgians of all ages (i.e., children, adolescents and adults). It is the GRITS system that tracks immunizations and related information for children and adolescents in Georgia.

To register for school in Georgia, your child will also need a Form 3300, "Hearing/Vision/Dental Implant Form,” a birth certificate, Social Security card and proof of residence. You must bring these items to the Georgia Department of Public Health nearest to the child care center, the school may have the original and the child care facility a photocopy. OK. For instance, if your second-grader goes to an after-school program at a private child care center, the school may have the original and the child care facility a photocopy. Each family must provide a copy of the original or file a photocopy is not provided by a Georgia source or public health office. Georgia children are vaccinated at the Georgia certifying center, the school may have the original and the child care facility a photocopy.

*Each frog equals one dose.*

This schedule was adapted from the immunization schedule published by the Immunization Action Coalition and the recommendations approved by the Advisory Committee on Immunization Practices (ACIP), the American Academy of Pediatrics (AAP) and the American Academy of Family Physicians (AAFP).

1. Your infant may not need a dose of Hib vaccine at 6 months of age depending on the brand of vaccine that your health care provider uses.
2. A child that is younger than 9 years and getting vaccinated against influenza for the first time should get two doses spaced at least four weeks apart.
3. Vaccinations delayed or missed entirely should be given as soon as possible.
4. One dose of Tdap, one dose of MCV4, and 2 doses of HPV is recommended for persons 11-12 years. A booster dose of MCV4 is recommended at age 16 years.
5. Children age 2 and older with high-risk health problems may need additional doses.
6. Your infant may not need a dose of rotavirus at 6 months depending on the brand of vaccine your health care provider uses.

### Responsibilities Associated with Immunization Requirements

- **Physicians and Public Health Clinics:**
  - Knowing the current legal requirements for attendance and accurately completing the certificate
  - Administering immunizations according to the current Recommended Childhood and Adolescent Immunization Schedule
  - Reporting the occurrence of any diseases listed on the “Notifiable Disease List”
  - Report any adverse event following the administration of a vaccine to VAERS

- **Child Care and School:**
  - Review the certificates for validity prior to accepting
  - Develop a system for immunization certificate management
  - Have certificates available for inspection and audit by health officials
  - Report the occurrence of any disease listed on the “Notifiable Disease List”

### How To Comfort Your Child.

- Stay Calm – Your child can sense if you are nervous or upset.
- Talk Quietly – Speak in a soothing, quiet voice to comfort your child.
- Hold Your Child – Being close to you will comfort your child.
- Preoccupy Your Child – Try to distract your child with other things such as singing or playing a game.
- Bring a Toy – A toy or special item from home can help calm your child.
- Allow Your Child To Cry – It’s a normal response.
- Be Truthful – Don’t tell your child it won’t hurt.

### How To Keep On Track!

- Begin your child’s immunizations on time. Hepatitis B can be given at birth and other vaccines start at 6 weeks of age.
- Never miss a chance to get your child immunized.
- Have your doctor or nurse review, update and enter each immunization given into the Georgia Registry of Immunization Transactions and Services (GRITS).
- Keep a record of your child’s immunizations and take it with you when you visit your doctor or public health clinic.
- If you do not have a record, ask your provider to check GRITS.
- Mark the due date of your child’s next vaccination and stay on schedule.
- Talk with your doctor or nurse about each vaccine. Don’t be afraid to ask questions.
- Be careful to review all vaccine facts that you receive before your child is immunized.
- Take your child to a health care provider for check-ups and immunizations at the recommended times.
- Discuss any questions or concerns about vaccines with your child’s health care provider.
- Review all vaccine facts received before your child is immunized.
GRITS is a “birth-to-death” web-based registry that keeps track of immunizations and related information for Georgians of all ages (i.e., children, adolescents and adults). The GRITS system includes a comprehensive database of immunization histories to help individuals get the immunizations they need by keeping track of all vaccines they have received so they don’t get double or triple doses. GRITS provides important immunization records and forms (i.e., 3231) for keeping track of immunizations.

Required Form for Child Care and School Attendance

- The immunization form you need for your child to attend child care or school in Georgia is called the “Georgia Certificate of Immunization, Form 3231.” Your child’s immunization record must be reviewed by a Georgia doctor or public health clinic to get the certificate.
- Each facility your child attends should have a copy of the certificate on file. A photocopy is OK. For instance, if your second-grader goes to an after-school program at a private child care center, the school may have the original and the child care facility a photocopy.
- To register for school in Georgia, your child will also need a Form 3300, “Hearing/Vision/Dental Form,” a birth certificate, Social Security card and proof of residence.
