

Here are the “Top Certificate Bloopers”

- 11. No dose of Tdap or MCV4 for students born on or after 1-1-2002 entering 7<sup>th</sup> grade or “new entrants”
- 10. “Complete for School” checked for child under age 4.
- 9. No DTP/DTaP/DT given on or after the 4th birthday.
- 8. No 2nd dose of varicella documented.
- 7. 1st dose MMR given before age 1 yr.
- 6. 1st dose varicella given before age 1 yr.
- 5. Varicella immunity not documented. A vaccine administration date, or a 4 year digit in the box for diagnosed/serology/history is required.
- 4. Address and/or contact information not completed.
- 3. Placing an “X” in both “Complete for School Attendance” boxes when all requirements have **not** been met.
- 2. Doses of Hepatitis B spaced incorrectly. Frequently the 3rd dose is given before 24 wks. of age, the absolute minimum age.
- 1. No physician signature. By law, the form must be signed by a physician, Advance Practice Registered Nurse, or Physician Assistant licensed in Georgia, public health official, or state immunization program personnel. A stamp of a physician, APRN or PA’s written signature is permissible when cosigned by an office staff member.
