

Syndromic Surveillance Drug Overdose Emergency Department Visits: Georgia, November 2018

What is Syndromic Surveillance (SS)? SS is used as an early detection method for potential clusters or outbreaks, by tracking drug overdose-related emergency department (ED) visits based on the patient's chief complaint upon admission and/or discharge diagnosis. There are currently 127 Georgia hospitals and urgent care facilities that share these SS data within the State Electronic Notifiable Disease Surveillance System (SendSS).

Drug* Overdose ED Visits by Patient Zip Code[^], Georgia, November 2018

Percent Change^a of Drug* Overdose ED Visits, Georgia, June-August 2018 to September-November 2018

Top 5 Counties[^] with 15 or More Drug* Overdose ED Visits During November 2018

County	Monthly Rate ⁱ per 100,000 Population	Monthly Rate ⁱ per 100,000 Population
	November 2018	November 2017- November 2018
BARTOW	39.4	
DOUGLAS	24.7	
RICHMOND	22.7	
FLOYD	21.6	
HOUSTON	21.5	

Statewide, 1,076 ED visits for Drug* overdoses occurred in November 2018, compared to 1,181 in November 2017

Data source: Suspected drug overdose ED/Urgent Care visits by chief complaint upon admission and/or discharge diagnosis reported to DPH Syndromic Surveillance. See data limitations [here](#).

*Drugs may include any over the counter, prescription, or illicit drug.

[^]Zip code and county are based on patient residence.

ⁱRate indicates visits per 100,000 persons using 2017 Census data as the denominator. Excluded rates for counties with <15 visits.

^aPercent change data by county excludes counties with less than 3 visits.

Note: All data excludes patients ≤14 years of age. Counts represent the number of ED visits instead of the number of patients, therefore, patients with repeat visits may have been counted more than once.

Note: SS data is not the same as emergency department discharge data; drug overdose SS data is limited and based on accuracy of chief complaint and/or discharge diagnosis and what is reported to DPH SS. Data shown on this report may not depict the true burden of drug overdose in Georgia.
