## **Georgia WIC Food Package Handbook - Introduction**

Food packages are required to provide the full nutritional benefit within the maximum monthly allowances of all supplemental foods as allowed by federal regulations. Foods and quantities allowed vary by WIC category, age, nutrition risk, and amount of breastfeeding. The participant can choose foods from the Georgia WIC Approved Foods List as allowed by their assigned food package.

## **Food Package Design**

- I. Food Packages I and II are applicable to the infant category. Food Package I is for infants zero through five months of age and consists only of iron-fortified infant formula that is not an exempt infant formula. If an infant is breastfeeding, the amount of formula issued is based on the level of breastfeeding. Infant that are exclusively breastfeeding will not receive any formula. Food Package II is for infants six through eleven months of age and consists of iron-fortified infant formula, iron-fortified infant cereal, and infant fruits and vegetables. Infant cereal and infant fruits and vegetables may not be assigned to an infant less than six months old. Exclusively breastfed infants six through eleven months of age also receive infant meats. Food Packages I and II are designed for issuance to infants who do not have a medical condition. Exempt infant formulas cannot be authorized in food packages I and II.
  - A. The typical infant CPA Food Package Code (FPC) represents three packages – one for each infant age group (zero through three months, four through five months, and six through eleven months). A different amount of formula is allowed for each age group. See Food Package Assignment Guidelines below for information on breastfeeding food packages.
    1. Infants four through five months of age receive slightly more formula than the zero through three month-old infant. Infants six through eleven months of age receive less formula, but with the addition of infant cereal and infant food fruits and vegetables.
    2. There are a few powder exempt infant formulas that do not follow the standard sequencing described in the preceding paragraphs. The state-created food packages for powder PurAmino, Similac PM 60/40 and Pregestimil have special sequencing patterns to avoid over or under issuance.
  - B. Infants six through eleven months of age will receive infant cereal and infant food fruits and/or vegetables in varying amounts depending on feeding type. The participant will have the option to purchase four fresh bananas in place of 16 oz of infant food fruits and vegetables. The maximum number of bananas an infant may receive each month is four, regardless of feeding type. Any type of yellow banana, including organic bananas may be purchased. No red bananas or plantains are allowed.
  - C. Infant formulas are required to be issued through the infant's eleventh month of age.
- II. Food Package III is for women, infants, and children who have a documented qualifying medical condition(s) that requires the use of an infant formula [children and women only], exempt infant formula, or nutritional. Exempt infant formulas and WIC-eligible nutritionals are authorized only in Food Package III.

- III. Infants ages six through eleven months old who are unable to consume solid foods due to their qualifying medical condition(s) are eligible to receive formula at the higher maximum allowance rate allowed for infants ages four through five months old.
- IV. Food Package IV is for children 1 through 4 years of age. Children ages 24 months and older in Food Package IV are required to be issued only low-fat milk (1% or non-fat). Younger children (ages 12 through 23 months old) are only authorized to receive whole milk from WIC. A child assigned a state created food package is automatically transitioned from the whole milk food package to the low-fat milk food package.
- V. The food packages for women are categorized into three Federal food packages: V, VI, and VII. Each food package consists of different quantities of supplemental foods, and different allowed supplemental foods.
  - A. Food Package V is for two categories of women:
    - 1. Women with a singleton pregnancy (“Prenatal”).
    - 2. Women who are mostly breastfeeding up to one year postpartum (“Mostly Breastfeeding Women”) and whose Mostly Breastfed (MBF) infants receive formula from Georgia WIC in amounts that do not exceed the maximum allowances for MBF infants.
  - B. Food Package VI is for two categories of women:
    - 1. Women up to six months postpartum who are not breastfeeding their infants (“Non-Breastfeeding/Fully Formula Feeding Women”).
    - 2. Breastfeeding women (“Some Breastfeeding”) accepting formula for their infants in amounts that exceed the maximum monthly allowance for Mostly Breastfed (MBF) infants. At six months postpartum, the breastfeeding women in Food Package VI will no longer be issued supplemental foods but do remain eligible for WIC. Such women may remain on WIC as breastfeeding participants and receive nutrition education and breastfeeding support (up until they discontinue breastfeeding or their infants reach age 12 months, whichever happens first).
  - C. Food Package VII is for five categories of women:
    - 1. Breastfeeding women up to one year postpartum whose infants do not receive any formula or nutritionals from WIC (“Exclusively Breastfeeding Women”). These women are assumed to be exclusively breastfeeding their infants.
    - 2. Women who are pregnant with two or more fetuses (“Prenatal with Multiples”).
    - 3. Women who are mostly breastfeeding multiple infants (“Mostly Breastfeeding Multiples”) from the same pregnancy.
    - 4. Women who are pregnant and are exclusively or mostly breastfeeding an infant less than twelve months old.

5. Women exclusively breastfeeding multiple infants (“Exclusively Breastfeeding Multiples”) from the same pregnancy. None of the infants of a woman in this classification can receive any formula or nutritionals from WIC in order for the woman to qualify for this “super” food package. This package contains 1.5 times the amount of foods in the standard Food Package VII. Each of these “super” food packages consists of two alternating monthly packages. The rotation is done automatically by the computer system.
- VI. Refer to [Maximum Monthly Amounts Authorized for Women, Children and Infants](#) for specific foods and quantities allowed in each food package category and [Crosswalk](#) from federal category to Georgia Food Packages.
- VII. GA WIC has created standard food packages and packages to meet special nutritional needs (e.g., lactose intolerance). When a state-created food package that meets the needs of the participant is unavailable, the CPA assigns a District/Clinic-created food package. [See Tailoring and 999 Food Package Policy.](#)

## **Food Package Assignment Guidelines**

The CPA must evaluate and assign the appropriate food package to the participant for their WIC type. The CPA must evaluate and assign food packages at each WIC assessment/certification, upon receipt of a Medical Documentation Form (MDF) and at the request of the participant.

- I. Feeding type assignment for all infants and post-partum women (Mother/Baby Breastfeeding Dyad) must be in agreement. There are four feeding types available: Exclusively Breastfed (EBF), Mostly Breastfed (MBF), Some Breastfed (SBF), and Fully Formula Fed (FFF). Refer to [Feeding Type Table](#).
  - A. Exclusively Breastfed (EBF) infant food package codes are E00 and E01. At six months of age, infant cereal, infant fruits and vegetables, and infant meats are added to the food package. The computer system will automatically advance the food package at age six months from E00 to E01.
  - B. Mostly Breastfed (MBF) infant food package codes begin with “E,” “F,” “K,” and “J.”
    1. Food packages for MBF infants needing only one can, two cans or three cans of powder formula per month begin with “E,” “K,” and “J,” respectively. Food packages containing the maximum formula allowed begin with “F”. The computer will issue food packages beginning with an “F” to MBF infants, ages one month through three months old, a “G” package to MBF infants ages four through five months old, and an “H” package to MBF infants ages six through eleven months old. The WIC computer system will automatically add the infant cereal and infant foods to the food packages at the appropriate age.
    2. During the first month of life, the Mostly Breastfed (MBF) infant may not receive more than 104 reconstituted fluid ounces of formula from WIC (approximately one can of powder formula). Formulas that are only available in large powder container sizes cannot be issued to a MBF infant during the first month of life since their reconstituted yield exceeds the maximum allowed.
    3. When an infant’s initial certification is during the first month of life, the CPA will assign the CPA FPC that provides the amount of formula that should be issued after the first month and the FPC for the first month. From zero to twenty days of age this can either be E00 (no formula) or the appropriate FPC for one can of powder formula (i.e., E17 for Gerber Good Start Gentle).
    4. From twenty-one days to one month of age, the CPA is allowed a third choice for the first month’s food package. Since the infant is almost one month old, the CPA can assign the same package as the CPA FPC or the full amount of formula being prescribed after the first month. For example, entering F17 in the second box would provide the maximum formula amount of four cans allowed for ages one to three months. This option is only available at the initial certification.

5. Infant formula issuance is limited during the first month to support the successful establishment of breastfeeding.
  - A. Some Breastfed (SBF) infant packages contain approximately 75% of the full package and begin with a “P”. The computer will issue food packages beginning with a “P” to SBF infants ages zero through three months old, a “Q” package to SBF infants ages four through five months old, and an “I” package to SBF infants ages six through eleven months old. The WIC computer system will automatically add the infant cereal and infant foods to the food packages at the appropriate age. The SBF infant may receive the full formula package if needed.
  - B. Fully Formula Fed (FFF) infant packages start with an “A.” The computer will issue internal system food packages beginning with an “A” to FFF infants ages zero through three months old, a “B” package to FFF infants ages four through five months old, and a “D” package to FFF infants ages six through eleven months old. However, the CPA FPC assigned by the CPA that began with an “A” and remains unchanged throughout the entire transition from birth through eleven months of age, unless there is a food package change. The WIC computer system will automatically sequence the formula quantities and add the infant cereal and infant foods to the food packages at the appropriate age.
  - C. Refer to [Estimating Formula Needs](#) to assist in determining the approximate amount of formula needed based on the infant’s usual breastfeeding habits.
- II. The infant’s age at “First Day to Use” has to be calculated to determine which food package to issue when ordering formula from the state office or issuing from stock.
  - A. If the infant’s age on the “First Day to Use” date for the voucher is zero to fifteen days old, round down to the nearest month.
  - B. If the infant’s age on the “First Day to Use” date for the voucher is sixteen to thirty days old, round up to the nearest month.
- III. Infant CPA FPCs for exempt infant formulas begin with an “R”. The computer will automatically sequence the infant through the “S” and “T” packages.
  - A. Fully Formula Fed infants receive the maximum amount of formula allowed for age regardless of the amount the physician requests on the medical documentation form. Their needs are constantly changing, and we do not require new medical documentation for each change.
  - B. Infants ages six through eleven months old who are unable to consume solid foods due to their qualifying medical condition(s) and who are assigned to food package III are eligible to receive formula at the higher maximum allowance rate allowed for infants ages four through five months old. The CPA can assign a CPA FPC beginning with an “S” for exempt formulas or “B” for infant formulas

- C. The “B” food packages can only be assigned to infants on standard infant formulas not receiving infant foods due to a qualifying medical condition.
- IV. The CPA FPCs for special formulas for women and children begin with an “X” or “Z”. A second food package field is available to enter a food package code for the appropriate supplemental foods based on the medical documentation provided. If a second food package is not needed, enter “000” in this field.
- A. Children and women receive only the amount of formula prescribed for them. The number of containers may be rounded up as long as the federal maximum of 910 fluid ounces is not exceeded.
- B. The maximum amount of formula or nutritional allowed is based on reconstituted fluid ounces of the product. To determine the maximum number of containers allowed, see [Maximum Monthly Amounts of WIC Foods Authorized – Fully Formula Fed](#) and [Maximum Monthly Amounts of WIC Foods Authorized For Children and Women with Qualifying Medical Conditions](#). If the product does not have standard mixing instructions (e.g., many metabolic formulas), then the formula should be issued by weight (See [Maximum Monthly Amounts of WIC Foods Authorized – Fully Formula Fed](#) and [Maximum Monthly Amounts of WIC Foods Authorized for Children and Women with Qualifying Medical Conditions](#).) If the prescribed product reconstitutes to an amount not listed or if the container size (if calculating by weight) is not on the tables, then call the Nutrition Unit for assistance.
- C. Women and children may receive up to the maximum quantities allowed for their WIC category of the juice, milk, cereal, eggs, fruits and vegetables, whole wheat bread or alternative, peanut butter and beans/peas as prescribed by their health provider on the [Medical Documentation Form](#). No supplemental foods may be issued to a Food Package III participant without appropriate medical documentation. (See [Maximum Food Quantities for Children and Women](#))
- D. For a food package III participant, if the prescribing authority requests whole milk on the medical documentation form, whole milk may be issued to women and children over age two years.
- E. Only children and women with qualifying medical conditions who are receiving formulas or nutritionals in Food Package III are eligible to receive infant cereal and infant foods in lieu of the adult cereal and cash value voucher, respectively.
1. Up to 32 ounces of infant cereal may be substituted for the 36 ounces of adult cereal for a woman or child in Food Package III if deemed appropriate by either the prescribing health care provider or by the CPA.
  2. Jars of infant food fruits and vegetables can be issued to women or children whose special dietary needs require the use of pureed food receiving Food Package III in lieu of the cash value produce voucher. Children can receive 128 ounces of infant fruit/vegetables in place of the \$8 cash value voucher. Women may receive 176 ounces in place of the \$11 cash value voucher and 264 ounces in place of the \$16.50 cash value voucher.

- V. The food package codes for children twelve through 23 months of age are C01 – C13 and ages two through five years old are C21 – C34.
  - A. The standard package for children 12 through 23 months of age contains whole milk and no cheese. A 999 food package can be used to issue cheese to this age group.
  - B. Children ages 24 months and older will receive low-fat or non-fat milk.
- VI. Women food packages begin with “W.”
  - A. The food package codes for Prenatal and Mostly Breastfeeding Women are W00 – W14.
  - B. The food package codes for Postpartum Non-Breastfeeding/Fully Formula Feeding and Some Breastfeeding Women are W20 – W34 plus W80 for Some Breastfeeding women greater than six months postpartum.
  - C. The FPCs for Exclusively Breastfeeding Women are W40 – W79.
  - D. Women will receive low-fat or non-fat milk.
- VII. Participants or their caregiver should be advised that the supplemental foods issued are only for their personal use.

### Food Package Category Crosswalk

<b>Food Package Name from the Federal WIC Regulations</b>	<b>Age/Condition</b>	<b>Food Package Series Number (Internal)</b>
Food Package IA	Fully Formula Fed (FFF) infants ages 0 through 3 months	A00-A99
	Some Breastfeeding (SBF) infants ages 0 through 3 months	A00 - A99, P00 - P99
	Mostly Breastfed (MBF) infants ages 0 through 1 month	E02 – E60, E70 – E99
	Mostly Breastfed (MBF) infants ages 1 through 3 months	E02 – E60, E70 – E99 F00 – F99, J00 – J99, K00 – K99
	Exclusively Breastfed (EBF) infants ages 0 through 5 months	E00
Food Package IB	Fully Formula Fed (FFF) infants ages 4 through 5 months	(B00 – B99)
	Some Breastfeeding (SBF) infants ages 4 through 5 months	(B00 – B99), (Q00 – Q99)
	Mostly Breastfed (MBF) infants ages 4 through 5 months	(G00 – G99) E00 – E99, J00 – J99, K00 – K99
Food Package II	Fully Formula Fed (FFF) infants ages 6 through 12 months	(D00 – D99)
	Some Breastfeeding (SBF) infants ages 6 through 12 months	(D00 - D99), (I00 – I99)
	Mostly Breastfed (MBF) infants ages 6 through 12 months	(H00 – H99), (L00 – L99), (M00 – M99), (N00 – N99)

	Exclusively Breastfed (EBF) infants ages 6 through 12 months	(E01)
Food Package III	Medically fragile women, infants, and children with qualifying medical conditions receiving special formulas / nutritionals, OR  an infant greater than six months on standard infant formula and not receiving infant foods due to a medical condition that prohibits the consumption of infant foods	R00 – R99, (S00 – S99), (T00 – T99), (V04, V14, V50- V59, V90-V99)  X00 – X99, Z00 – Z99  B00-B99
Food Package IV	Children ages 1 through 4 years	C00 – C99, (V21)
Food Package V	Pregnant women  Mostly breastfeeding women	W01 – W19, (V10)
Food Package VI	Non-breastfeeding women  Women breastfeeding some	W20 – W39, (V34)
Food Package VII	Exclusively breastfeeding women Women pregnant with multiple fetuses Women mostly breastfeeding multiples Pregnant women exclusively or mostly breastfeeding an infant	W40 – W79 (V60 – V79)

**Feeding Type Table**

<b>Mother Receives:</b>	<b>Infant Receives:</b>	<b>Federal Terminology:</b>
Exclusively Breastfeeding (EBF) woman food package	Exclusively Breastfed (EBF) food package (receives no formula from WIC)	Fully Breastfed infant and Fully Breastfeeding Woman
Mostly Breastfeeding (MBF) woman food package	Mostly Breastfed (MBF) food package (does not exceed monthly formula allowance for Mostly Breastfed infant)	Partially Breastfed Infant and Partially Breastfeeding Woman where a singleton infant receives formula from the WIC program in amounts that does not exceed the maximum allowances for FP I-BF/FF A, B, C or II-BF/FF
<p>If less than 6 months postpartum: a Some Breastfeeding (SBF) woman food package</p> <p>If greater than 6 months postpartum: Some Breastfeeding (SBF) woman food package W80 (with no foods)</p>	Formula in an amount that exceeds the monthly allowance for a Mostly Breastfed infant and breast milk	Partially Breastfed Infant and Partially Breastfeeding Woman where a singleton infant receives formula from the WIC program in amounts that exceeds the maximum allowances for FP I-BF/FF A, B, C or II-BF/FF
<p>If less than 6 months postpartum: Non-Breastfeeding woman food package</p> <p>If greater than 6 months postpartum: mother is no longer WIC eligible</p>	Fully Formula Fed (FFF) food package and breast milk less than once a day	Fully Formula Fed

	24 ounces	5 cans- (120 oz)	5 cans	4 cans
	25.7 ounces	4 cans- (102.8 oz)	5 cans	3 cans
Exempt infant formulas are those designed for low birth weight infants or infants with an inborn error of metabolism, or other medical or nutritional problem. To determine if a formula is exempt visit the WIC formula database at: <a href="http://grande.nal.usda.gov/wicworks/formulas/FormulaSearch.php">http://grande.nal.usda.gov/wicworks/formulas/FormulaSearch.php</a> . Each formula is categorized as an infant formula or an exempt infant formula.				

<sup>1</sup> For each type listed, the most economical size is recommended

<sup>2</sup> Sizes listed are not all-inclusive

<sup>3</sup> Maximum amounts are listed for each age group for each form

<sup>4</sup> Formula yield per container based on standard mixing instructions (reconstituted). Refer to product label or manufacturer's website for reconstitution. If fluid ounce yield is not listed on label ask for assistance from Nutrition Unit

<sup>5</sup> Use this table **only** for exempt infant formulas and nutritionals that do **not** have standard instructions for reconstitution, such as metabolic formulas

**Maximum Monthly Amounts Authorized – Mostly Breastfed**  
**FORMULA TYPES, SIZES, AND MAXIMUM AMOUNTS**

	16 ounces	4 cans- (64 oz)	4 cans	3 cans
	24 ounces	2 cans- (48 oz)	3 cans	2 cans
	25.7 ounces	2 cans- (51.4 oz)	2 cans	2 cans
Max Allowed	Weight of dry powder	64 oz	77 oz	56 oz

Exempt infant formulas are those designed for low birth weight infants or infants with an inborn error of metabolism, or other medical or nutritional problem. To determine if a formula is exempt visit the WIC formula database at: <http://grande.nal.usda.gov/wicworks/formulas/FormulaSearch.php>  
Each formula is categorized as an infant formula or an exempt infant formula.

<sup>1</sup> For each type listed, the most economical size is recommended

<sup>2</sup> Sizes listed are not inclusive

<sup>3</sup> Maximum amounts are listed for each type

<sup>4</sup> Formula yield per container based on standard mixing instructions (reconstituted). Refer to product label or manufacturer's website for reconstitution. If fluid ounce yield is not listed on label ask for assistance from Nutrition Unit

<sup>5</sup> Use this table only for powdered products that do not have standard instructions for reconstitution, such as metabolic formulas

**Maximum Monthly Amounts Authorized – Infant Foods**  
**Formula Types, Sizes, and Maximum Amounts**

(For Infants 6 through 12 Months)

<b>INFANT FOOD</b>	<b>MAXIMUM AMOUNTS</b>			
	<b>Total Allowed</b>	<b>SIZE</b>	<b>FFF/MBF</b>	<b>EBF</b>
Infant Cereal	24 ounces	8 ounces	3 boxes	3 boxes
Infant Fruit and Vegetable	128 ounces	4 ounces	32 jars	64 jars
		8 ounces	16 twin packs	32 twin packs
Infant Meats	77.5 ounces	2.5 ounces	N/A	31 jars

**FORMULA TYPES, SIZES AND ADDITIONAL AMOUNTS**

<b>Formula Type:</b>	<b>Child Max</b>
<u>Concentrate-</u>	455 fluid ounces
<u>RTF-</u>	910 fluid ounces
<u>Powder-</u>	910 fluid ounces reconstituted or 144 oz (if no standard dilution)

TYPE	CAN SIZE	Children & Women Maximum Amounts
<u>Concentrate</u>	13 ounces	35 cans or 455 ounces maximum concentrate or 910 fluid ounces reconstituted
	12.1 ounces	37 cans or 477.7 ounces concentrate or 895.4 fluid ounces reconstituted
<u>Ready-To-Feed</u>	32 ounces	28 cans or 910 fluid ounces
	33.8 ounces	26 4-packs or 878.8 fluid ounces

**Table for Powder Formulas with Standard Mixing Instructions**

<u><b>Powdered</b></u> <sup>4</sup>	Reconstituted fluid ounces per container	Maximum Number of Cans Allowed
	66-70	13
	71-75	12
	76-82	11
	83-91	10
	92-101	9
	102-113	8
	114-130	7
Maximum Allowed		910 fl oz

<sup>4</sup>Refer to product label or manufacturer's website for reconstitution.

**Table for Powder Exempt Formulas and Nutritionals without Standard Reconstitution  
Instructions for Children and Women**

<u><b>Powdered</b></u> <sup>5</sup>	144 ounces Maximum by can weight	Maximum Number of Cans Allowed Per Month
	12 ounces	12 cans
	12.8 ounces	11 cans
	12.9 ounces	11 cans
	14.1 ounces	10 cans
	14.3 ounces	10 cans
	16 ounces	9 cans
	24 ounces	6 cans
	25.7 ounces	5 cans

<sup>5</sup>Use this table only for powdered products that do not have standard instructions for reconstitution, such as metabolic formulas.

### Maximum Monthly Amounts of WIC Foods Authorized for Children

Food Package IV	
FOOD	MAXIMUM AMOUNT PER MONTH
Milk <sup>1,2</sup>	16 quart equivalents
Cheese <sup>3</sup>	1 pound
Tofu	4 pounds
Eggs	1 dozen
Juice	2-64 ounce containers
Cereal	36 ounces (Maximum of 32 oz infant cereal)
Beans/Peas <b>OR</b> Peanut Butter	1 pound bag dried or 4 cans (15-16 ounces) <b>OR</b> 1 container (16-18 oz)
Fruits and Vegetables	\$8.00
Whole Grain Bread or alternative	32 ounces

<sup>1</sup> May substitute up to 16 quarts of lactose reduced milk for up to 4 gallons of milk.

<sup>2</sup> Substitution amounts for fluid milk include:

ITEM	FLUID MILK EQUIVALENTS
Cheese, 1 pound	3 quarts <sup>3</sup>
Evaporated milk, whole or skim , 12 ounces	4 cans equal 3 quarts <sup>4,5</sup>
Nonfat or low-fat dry milk	1-3 quart container equal to 3 quarts <sup>6,7</sup>
Tofu, 1 pound	1 quart <sup>8</sup>

<sup>3</sup> Subtract from monthly milk allotment. A maximum of one (1) pound of cheese per month is allowed.

<sup>4</sup> If no cheese is issued, a maximum of 12 quarts of milk may be substituted with evaporated milk (16 cans). This leaves one gallon of fluid milk in the food package.

<sup>5</sup> If one pound of cheese is issued, a maximum of 9 quarts of milk may be issued with evaporated milk (12 cans). This leaves one gallon of fluid milk in the food package.

<sup>6</sup> If no cheese is issued, a maximum of 12 quarts of milk may be substituted with dry powder milk. This leaves one gallon of fluid milk in the food package.

<sup>7</sup> If one pound of cheese is issued a maximum of 9 quarts of milk may be substituted with dry powder milk. This leaves one gallon of fluid milk in the food package.

<sup>8</sup> Subtract from monthly milk allotment.

See [Milk/Cheese/Tofu Substitution Tables](#) for more information on milk substitutions

Juice	3 (48 oz) containers or 3-12 oz cans frozen or 3-11.5 oz cans pourable	3 (48 oz) containers or 3-12 oz cans frozen or 3-11.5 oz cans pourable	2 (48 oz) containers or 2-12 oz cans frozen or 2-11.5 oz cans pourable
Cereal	36 ounces	36 ounces	36 ounces
Beans/Peas <b>and/or</b> Peanut Butter	1 pound bag dried or 4 (15-16 oz) cans <b>and</b> 1 container (16-18 oz)	1 pound bag dried or 4 (15-16 oz) cans <b>and</b> 1 container (16-18 oz)	1 pound bag dried or 4 (15-16 oz) cans <b>OR</b> 1 container (16-18 oz)
Fruit and Vegetable	\$11.00	\$11.00	\$11.00
Whole Grain or Alternative	16 oz	16 oz	N/A
Fish <sup>1</sup>	N/A	29 to 30 oz	N/A

<sup>1</sup> Additional item authorized for Food Package VII only.

<sup>2</sup> May substitute up to maximum quart equivalents of lactose reduced milk for milk.

<sup>3</sup> Substitution amounts for fluids milk include:

ITEM	FLUID MILK EQUIVALENTS
Cheese, 1 pound	3 quarts <sup>4</sup>
Evaporated milk, non-fat (12 oz)	4 cans equal 3 quarts <sup>6</sup>
Nonfat or low-fat dry milk	1-3 quart container equal to 3 quarts <sup>7</sup>
Tofu, 1 pound	1 quart <sup>5</sup>

<sup>4</sup> Subtract from monthly milk allotment. A maximum of one (1) pound of cheese per month is allowed for women in Food Packages V and VI. Women in Food Package VII are allowed up to a total of two (2) pounds of cheese per month.

<sup>5</sup> One (1) pound of tofu can be substituted for 1 quart of milk. Subtract from monthly milk allotment.

<sup>6</sup> For postpartum women not receiving cheese, a maximum of 12 quarts of milk may be substituted with evaporated milk or 9 quarts when one (1) pound of cheese is issued. In both cases this leaves one gallon of fluid milk.

For pregnant and breastfeeding women not receiving cheese, a maximum of 18 quarts of milk may substituted with evaporated milk or 15 quarts when one (1) pound of cheese is issued. In both cases, one gallon of fluid milk is left.

For exclusively breastfeeding women 21 quarts of milk may be substituted with evaporated milk. They would receive two (2) pounds of cheese with this package.

<sup>7</sup> For postpartum women not receiving cheese a maximum of 12 quarts of milk may be substituted with dry powder milk or 9 quarts with one (1) pounds of cheese. In both cases one gallon of fluid milk is left.

For pregnant and breastfeeding women not receiving cheese, a maximum of 18 quarts of milk may substituted with dry powder milk or 15 quarts when one (1) pound of cheese is issued. In both cases one gallon of fluid milk is left.

For exclusively breastfeeding women 21 quarts of milk may be substituted with dry powder milk. They would receive two (2) pounds of cheese with this package.

<sup>8</sup> Women exclusively breastfeeding multiple infants receive 1.5 times the amounts of food listed in the table for women exclusively breastfeeding one infant. Items not in full packages can be averaged over two months (e.g., 1.5 jars of peanut butter with one jar being issued one month and two jars to next month).

**FOR CHILDREN AND WOMEN WITH QUALIFYING MEDICAL CONDITIONS:

### Estimating Formula Needs

Feeding Type	Amount of Powder Formula to Issue	Daily Formula Intake	Weekly Formula Intake	Monthly Amount Needed
MBF	1 can	3 oz	14 – 20 oz	60 - 90 oz
MBF	2 cans	6 oz	21 – 41 oz	91- 180 oz
MBF	3 cans	9 oz	42– 62 oz	181 - 270 oz
MBF	4 cans	12 oz	63– 83 oz	271 - 360 oz
MBF	5 cans	16 oz	84 – 104 oz	361- 450 oz
SBF	6 cans	18 oz	105 – 125 oz	451 – 540 oz
SBF	7 cans	21 oz	126 – 146 oz	541 – 630 oz

One can of powder formula equals approximately 3.5 cans of concentrate. One can of powder formula equals approximately 3 cans of ready to feed.

### Maximum Amounts Allowed for Standard Formula – Fully Formula Fed Infant

Age (months)	0-3	4-5	6-11
Powder (12.7 oz)	9	10	7
Concentrate (12.1 oz)	34	37	26
Ready to feed (33.8 oz)	25	27	19

### Maximum Amounts Allowed for Standard Formula – Mostly Breastfed Infant

Age (months)	0-1	2-3	4-5	6-11
Powder (12.7 oz)	1	4	5	4
Concentrate (12.1 oz)	3	15	18	13
Ready to feed (33.8 oz)	3	12	14	10

## Infant Formulas with Sequencing Exceptions

### Neocate Infant

Age at Issuance	Package Assigned	Package Issued	Amount Issued
0 days –1 month 15 days	R61	V51	9 powder
1 month 16 days – 3 months 15 days		R61	8 powder
3 months 16 days – 4 months 15 days		V52	10 powder
4 months 16 days – 5 months 15 days		S61	9 powder
5 months 16 days – <12 months		T61	7 powder+
5 months 16 days – 6 month 15 days	S61	V53	10 powder*
6 month 16 days - <12 months		S61	9 powder*

### Pregestimil (Powder)

Age at Issuance	Package Assigned	Package Issued	Amount Issued
0 days –1 month 15 days	R04	V04	8 powder
1 month 16 days – 3 months 15 days		R04	7 powder
3 months 16 days – 5 months 15 days		S04	8 powder
5 months 16 days – <12 months		T04	6 powder+
5 months 16 days – <12 months	S04	S04	8 powder*

### PurAmino

Age at Issuance	Package Assigned	Package Issued	Amount Issued
0 days –1 month 15 days	R91	V91	9 powder
1 month 16 days – 3 months 15 days		R91	8 powder
3 months 16 days – 4 months 15 days		V92	10 powder
4 months 16 days – 5 months 15 days		S91	9 powder
5 months 16 days – <12 months		T91	7 powder+
*5 months 16 days – 6 month 15 days	S91	V93	10 powder*
