Section 2: Education

The DPH Rules for On-site Sewage Management Systems stipulate that “any person who holds a valid certificate of registration as a geologist issued pursuant to Chapter 19 of Title 43 and is practicing within his or her area of competency may register with the Department of Public Health to perform soil investigations of the suitability of a site within the State for an on-site sewage management system, provided they meet the insurance requirements and provide a complete application to the Department.

Demonstration of “practicing within his or her area of competency” normally requires a degree in geology or geological engineering, and at least 5 quarter hours or 3 semester hours of college level courses in soil classification, soils laboratory, or geotechnical engineering. The Soil Classifiers Certification Advisory committee may recommend approval of a geologist to perform soil investigations if, in the judgment of the Committee, documentation of equivalent training and experience demonstrates competence.
